## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

**HARMFUL IF SWALLOWED.** Avoid inhalation of spray mist. Do not apply in freezing weather or when temperature is likely to drop to slow freezing soon after spraying. Do not apply to broadleaved evergreens when near-freezing temperatures are expected within 3 weeks. Do not apply during or immediately before hot dry weather. Do not apply to plants suffering from drought. Do not apply to ferns, palms, or non woody plants. Do not apply within 30 days before or after an application of sulphur.

Do not contaminate water by cleaning of equipment or disposal of wastes.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**FRUIT TREES**—During the dormant or delayed dormant period, to control scale insects and eggs of European red mite, clover mite, apple rust mite, and fall cankerworm on apples, pears, cherries, peaches, and plums, use 5 tablespoonfuls per gallon of water and apply spray thoroughly to twigs, branches, and trunk early in the spring, on bright, clear days when the temperature is above 45°F, during the time from just before growth starts until the young leaves are not more than 1/2 inch in length.

During the summer when foliage is present, use 5 tablespoonfuls per gallon of water and apply spray thoroughly to foliage and branches to control scale insects, two-spotted mite, red bug, and thrips. Apply when insects first appear, preferably before they cause noticeable damage, and repeat at 30-day intervals, if necessary, until 3 applications have been made during the growing season.

**SHADE TREES AND ORNAMENTAL SHRUBS**—During the dormant or delayed dormant period, to control scale insects and eggs of European red mite on deciduous shade trees and hardy ornamental shrubs, use 5 tablespoonfuls per gallon of water and apply spray thoroughly to twigs, branches, and trunk early in the spring, on bright, clear days when the temperature is above 45°F, just before growth starts.

During the summer period when foliage is present use 5 tablespoonfuls per gallon of water and apply spray thoroughly to foliage and branches to control scale insects, whiteflies, mealybugs, thrips, and two-spotted

mites. Apply when insects first appear, preferably before they cause noticeable damage, and repeat at 30-day intervals, if necessary, until 3 applications have been made during the growing season.

**HARDY HOUSE PLANTS**—As a general conditioner and plant polish for hardy house plants, use 2 tablespoonfuls per gallon of water and apply spray lightly to foliage.

**GREENHOUSES**—To control scale insects, two-spotted mite, mealybugs, and whitefly on azaleas, camellias, gardenias, and other hardy plants, use 1 1/2 to 2 tablespoonfuls per gallon of water and apply spray uniformly to branches and foliage. Do not apply sprays closer than 60 days apart and do not make more than 3 applications per season.

**TO MIX**—Fill spray tank about one-third full with water, pour in the required amount of Spray Oil, stir or agitate thoroughly and then fill remainder of tank with water. Some agitation is required to maintain the emulsion while spraying.

The dilution rate of 5 tablespoonfuls per gallon is equivalent to 1 pint per 3 gallons, or 2 gallons per 100 gallons of water.

### STORAGE AND DISPOSAL

**STORAGE:** Store product in original container and in a locked storage area. Do not store with or near feed or food products.

**PESTICIDE DISPOSAL:** Securely wrap original container in several layers of newspaper and discard in trash.

**CONTAINER DISPOSAL:** Do not reuse empty container. Rinse thoroughly before discarding in trash.

### WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty, including any other express or implied warranty of **Fitness** or of **Merchantability**, and no agent of Seller is authorized to do so, except in writing with a specific reference to this warranty. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
