# KLEEN WALK WEED KILLER

Prevents weed and grass growth on walks, driveways, and patios. Herbicide for non-selective control of weeds in areas where vegetation generally may be killed.

## Active Ingredients:

Prometon: 2,4-Bis (isopropylamino)-6-methoxy-s-triazine .....	1.49%
Petroleum solvent .....	94.00%
Inert Ingredients .....	4.51%
Total .....	100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Side Panel For Additional Cautions

CC-OP

Harmful if swallowed or absorbed through skin. Causes skin irritation. Do not breathe vapor or spray mist. Do not get in eyes, on skin, or on clothing. If swallowed, do not induce vomiting. Call a physician or Poison Control Center immediately. Aspiration is a potential hazard with this petroleum-based product. In case of skin contact, wash with soap and water. If in eyes, flush with plenty of water and get medical attention. Wash thoroughly after handling. Avoid contamination of feed and foodstuffs. Do not store or use near heat or open flame. Do not store with or near feed, seeds, fertilizers, insecticides, and fungicides.

## ENVIRONMENTAL HAZARDS

*Do not apply directly x x x*

This product is poisonous to fish and wildlife. Keep out of any body of water. Apply only for the purpose and in the manner stated in this label. Do not apply when weather conditions favor drift of spray from area treated. Clean application equipment and dispose of rinse solutions in a pit on non-productive soil located well away from water supplies.

## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

USE THIS PRODUCT ONLY IN OR ON AREAS WHERE ALL PLANT GROWTH MAY BE PREVENTED FOR SEVERAL WEEKS TO AN ENTIRE GROWING SEASON. DO NOT USE ON OR NEAR DESIRABLE PLANTS OR CROPS, OR ON THE SOIL IN WHICH DESIRABLE PLANTS ARE GROWING OR ARE TO BE GROWN.

APPLICATION - To control most annual and shallow-rooted weeds and grasses, this product undiluted may be applied as a spray, or it may be mixed with kerosene and the diluted mixture applied as a spray.

The best time to apply is before weed seeds germinate or soon after weed emergence when the weeds are in a rapidly-growing succulent condition and are not over 2 to 4 inches tall. If unwanted vegetation is more than 4 inches high, cut or mow to a height of about 2 inches, remove cut vegetation, and apply the spray to the remaining stubble and soil.

Although "burning" of plant foliage may be evident within a few days after application, this product acts primarily through the roots and therefore, sufficient rainfall to move the chemical into the root zone in the soil is necessary, and actual killing of weeds may require 2 to 3 weeks after adequate rainfall has occurred. Under conditions of frequently heavy rainfall or if the growing

season is long, a second application may be necessary to maintain seasonal control of weeds.

**RATES** — To control annual weeds and grasses on walks, driveways, patios, clay tennis courts, and parking lots, apply 1 quart of undiluted product per 100 square feet (10' x 10') of area to be treated. The spray should be applied uniformly and thoroughly to the area.

For firelanes, fence rows, and similar nonproductive areas where vegetation is not desired, dilute or mix 1 quart of product in 1 gallon of Kerosene and apply the total quantity of mixture to 100 square feet of area. The application may be made with a sprayer to effect uniform distribution and thorough coverage of the weed foliage and the soil. A second application may be required in 2 months to suppress deep-rooted perennial weeds such as Canada thistle and milkweed.

For spot treatments in driveways, walks, and patios, apply the undiluted product as soon as weeds are noticed, as a coarse wetting spray.

**LIMITATIONS** — Considerable caution must be exercised in using this material to avoid injury to crops and desirable plants. Keep the spray away from flower beds, lawns, shrubs, and other desirable vegetation.

Apply only when there is no hazard from drift of spray from the area treated, since even minute quantities may cause severe injury to nearby plants. Coarse spray is less likely to drift. Do not apply to the soil in areas where the roots of desirable trees or ornamental plants may extend, or in locations where the chemical may be washed into contact with their roots. Do not apply within the drip line of trees and shrubs. Do not clean application equipment in these areas.

Do not graze or feed or sell for feeding to livestock and poultry any foliage from treated areas. Keep children and pets off treated areas until the herbicide has been washed into the soil by adequate rainfall and weed foliage has completely dried. If tall vegetation is treated, remove when dead to reduce hazard from fire.

Application equipment and utensils used to apply this herbicide should not be used subsequently for applying insecticides, fungicides, selective herbicides, and fertilizers, since it is almost impossible to clean such equipment adequately to prevent injury to desirable plants. Thoroughly clean and dry mechanical equipment after each use, however, to reduce corrosion.

## STORAGE AND DISPOSAL

**STORAGE:** Store product in original container and in a locked storage area. Do not store with or near food, feed, seeds, fertilizers, insecticides, or fungicides.

✓ **PESTICIDE DISPOSAL:** Securely wrap original container in several layers of newspaper and discard in trash.

**CONTAINER DISPOSAL:** Do not reuse empty bottle. Rinse thoroughly before discarding in trash.

#### WARRANTY AND LIMITATION OF DAMAGES

✓ Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty, including any other express or implied warranty of Fitness or of Merchantability, and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
