Ms. Nik Edighoffer
Universal Cooperatives, Inc.
P.O. Box 460
Minneapolis, MN 55440

Dear Ms. Edighoffer,

Subject: Amendment - Alternate Formulations
Diazinon 4EC (AG)
EPA Registration Number 1386-599
Your Application Dated February 22, 1989

The subject Confidential Statements of Formula (CSFs) are acceptable and have been made a part of the record for this product. However, we have the following comment with respect to certified limits:

Based on the current CSFs dated February 9, 1989, your product will not meet the label claim for the active ingredient. Note that the lower limit of the active must be the same as the label claim in pure active form. Please revise the label or the CSF so the information agrees.

The solvent used (xylene) is not considered active in this type formulation. Therefore, delete it from the active ingredient statement and include it in the total percentage of "Inert Ingredients." Since this chemical may present an aspiration hazard if the product were accidentally ingested, add the following footnote to the inert ingredient statement:

*Contains xylene range aromatic solvents.

[Note: The asterisk should also be placed above Inert Ingredient.]

LeMaster 6/10/90

Please note that a Registration Standard for products containing diazinon was issued in December, 1988 and amended August 26, 1989. Please review these documents for relevant label changes concerning the subject product. These documents may be obtained from the National Technical Information Service at the following telephone number (703) 487-4650 or by mail at the following address:

National Technical Information Service
Attn: Order Desk
5285 Port Royal Road
Springfield, VA 22161

(Note - These documents are available for a fee.)

Sincerely,

George T. LaRocca
