Malathion 6 Grain Protectant

KEEP OUT OF REACH OF CHILDREN
CAUTION

See Below For Additional Precautionary Statements

ACTIVE INGREDIENT

Malathion (O,O-dimethyl dithiophosphate of diethyl mercaptosulfonate)

INERT INGREDIENTS

Total

94
100

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Avoid contact with skin. Avoid breathing dust. Avoid contact with skin. Wash thoroughly after handling. Avoid contact with feed and foodstuffs.

STATEMENT OF PRACTICAL TREATMENT
If swallowed, call a physician or Poison Control Center immediately. Give victim one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person. If inhaled, remove victim to fresh air. Apply respiration if indicated. If on skin, wash with soap and water. If in eyes, flush with water for at least 15 minutes. Contact a physician.

ENVIRONMENTAL HAZARDS
Do not pollute streams. Keep out of areas where they are used for drinking water. Clean water by leaching of equipment. Dispose of wastes.

IMPORTANT
When this product is treated with the grain, it is not to be used for normal production methods.

DIRECTIONS FOR USE

In accordance with Federal law to use this product in a manner consistent with its labeling.

FOR USE ON STORED GRAINS: Wheat, corn, oats, rice, barley, grain sorghum, field and garden seeds.

PROTECTS AGAINST DAMAGE FROM: Confused flour beetle, red flour beetle, lesser grain borer, Indian meal moth, grain weevil, red flour beetle, rusty grain beetle, lesser grain borer, Indian meal moth.

APPLICATION RATES: Apply MALATHION 6 GRAIN PROTECTANT DUST to the grain or seed at the rate of 10 lbs. per 1000 bushels as the grain is being loaded or turned into final storage. To protect stored grain or seed from attack by Indian meal moth, apply this product to the surface of grain or seed at the rate of 5 lbs. per 1000 square feet of surface area. Apply the dust evenly over the surface immediately after the grain or seed is loaded into storage. Repeat if necessary.

HOW TO APPLY: One convenient way to apply MALATHION 6 GRAIN PROTECTANT DUST to shelled corn and small grains is to treat it when it is in the field wagon or truck prior to binning. Determine the amount in the wagon or truck by multiplying the length by width by depth (all in feet) and multiply this total by 28 to get the number of bushels. Measure out the correct amount of MALATHION 6 GRAIN PROTECTANT DUST and spread evenly over the surface of the grain in the wagon or truck bed. Cut the dust into the grain with a shovel. The dust will become mixed with the grain as it is hauled from the field to the storage bin and as it is dumped from the wagon into the auger hopper. Further mixing will occur when the grain is augered or blown into the storage bin. Mixing is completed as the treated grain rolls down the cone shaped pile in the bin.

Another method of applying MALATHION 6 GRAIN PROTECTANT DUST to grain or seed is to evenly meter the correct amount of dust onto the grain or seed as it is being transferred to storage. Use no suitable metering device. Mixing is completed as the grain or seed is transferred into storage and rolls down the cone shaped pile in the bin.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into applicator equipment. Then dispose of empty bag in a sanitary landfill or by incineration or if allowed by State and local authorities by burning. If burned, stay out of smoke.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty, including any other express or implied warranty of Fitness or Merchantability, and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION

Wash thoroughly after handling. Avoid breathing dust. Avoid contact with skin. Wash thoroughly after handling. Avoid contamination of feed and foodstuffs.

STATEMENT OF PRACTICAL TREATMENT

If swallowed, call a physician or Poison Control Center immediately. Give victim one or two glasses of water and induce vomiting by pumping back of throat with finger. Repeat until victim's fluid is clear. Do not induce vomiting if victim is unconscious. If inhaled, remove victim to fresh air. Apply respiration if indicated. If on skin, wash with soap and water. If in eyes, flush with water for at least 15 minutes. Contact a physician.

ENVIRONMENTAL HAZARDS

Do not apply to waterways, streams, rivers, or other bodies of water. Do not contaminate water by cleaning equipment or disposing of containers.

IMPORTANT

Do not use on crops treated with a fungicide. Do not use on crops treated with a fungicide. Do not use on crops treated with a fungicide.

DIRECTIONS FOR USE

FOR USE ON STORED GRAINS: Apply MALATHION 6 GRAIN PROTECTANT DUST to stored grain in bins, elevators, and garden seeds. **PROTECTS AGAINST DAMAGE FROM:** Weevils, beetles, moths, and other insects.

APPLICATION RATES: Apply MALATHION 6 GRAIN PROTECTANT DUST to stored grain at the rate of 1/2 lb. per 100 bushels of grain. Apply to stored grain in bins, elevators, and garden seeds at the rate of 1/2 lb. per 1000 square feet of surface area. Do not apply to stored grain in bins, elevators, and garden seeds until the grain is completely dry.

HOW TO APPLY: One convenient way to apply MALATHION 6 GRAIN PROTECTANT DUST to stored grain is to use a dust applicator. Determine the amount in the wagon or truck by weighing the empty wagon or truck and multiply this weight by 0.008 to get the number of bushels. Measure out the correct amount of MALATHION 6 GRAIN PROTECTANT DUST and spread evenly over the surface of the grain in the wagon or truck. Dump the dust into the grain with a shovel. The dust will become mixed with the grain as it is shoveled from the wagon or truck into the bin and as it is dumped from the bin into the auger hopper. Further mixing will occur when the grain is shoveled into the storage bin and is completely mixed as the treated grain falls down the cone-shaped pile in the bin.

Another method of applying MALATHION 6 GRAIN PROTECTANT DUST to stored grain is to evenly meter the material over the grain in the wagon or truck and then dump the grain into storage using a surface metering device. Mix and accumulate as the grain is being transferred into storage and fall down the cone-shaped pile in the bin.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary and proper manner as required by State and local authorities by burning, if burned, stay out of smoke.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants that the material conforms to the labeling, description and is reasonably fit for the purposes stated on the label when used in accordance with directions, precautions, and terms of use and Buyer assumes the liability of any use contrary to such directions. Seller makes no other express or implied warranty, including any other express or implied warranty of Fitness, Utility, Merchantability, and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall Seller's liability for breach of warranty exceed the purchase price of the material to which the claim is made.
