Ms. Nik Ramswick Regulatory Affairs Tech. Universal Cooperatives 7801 Metro Parkway P.O. Box 460 Minneapolis, MN 55440

Dear Ms. Ramswick:

Subject: Malathion Use Deletions and Alternate CSF Malathion 6 Grain Protectant EPA Registration No. 1386-605

> Your Amended Labeling Submitted June 25, 1993 Federal Register Notice of March 29, 1995

Alternate CSF Dated June 29, 1994

BEST COPY AVAILABLE

The amended labeling and alternate Confidential Statement of Formula (CSF) referred to above, submitted in connection with registration under FIFRA, are acceptable, provided that you:

Submit one copy of your final printed labeling incorporating the following correction before you release the product for shipment.

Since there are no outdoor uses on the subject product labeling, delete the second and third sentence under the heading, "Environmental Hazards", i.e. "Jo not apply directly to water____" and "Drift and runoff____"

If this condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of this condition.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Robert A. Forrest Product Manager (14) Insecticide-Rodenticide Branch Registration Division (7504C)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid breathing dust, Avoid contact with skin. Wash thoroughly after handling. Avoid contamination of feed and foodstuffs.

STATEMENT OF PRACTICAL TREATMENT

If swallowed, call a physician or Poison Control Center Immediately. Give victim one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person. If Inhaled, remove victim to fresh air. Apply respiration if indicated. If on skin, wash with soap and water. If in eyes, flush with water for at least 15 minutes. Contact a physician.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish, aquatic invertebrates, and aquatic life stages of amphibians. Do not apply directly to water or wetlands (i.e., swamps, bogs, marshes, and potholos). Dritt and runoff may be hazardous to aquatic organisms in areas near the application site. Do not contaminate water when disposing of equipment washwaters.

IMPORTANT

Use of this product, as directed, will be within the tolerance of 8 parts per million for Malathion. Treated grain is not subject to downgrading and can be milled into flour or feed using normal production methods.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR USE ON STORED GRAINS: Wheat, com, oats, rye, barley,

PROTECTS AGAINST DAMAGE FROM: Confused flour beetle, rice weavil, granary weevil, saw-toothed grain beetle, flat grain beetle, red flour beetle, rusty grain beetle, lesser grain borer, Indian meat moth. APPLICATION RATES: Apply MALATHION 6 - GRAIN PROTECT/ANT DUST to the grain at the rate of 10 lbs, per

1,000 bushels as the grain is being loaded or turned into final storage. To protect stored grain from attack by Indian at the rate of 5 lbs. per 1,000 square feet of surface area. Apply is loaded into storage. Repeat if necessary. Meal Moth, apply this product to the surface of grain

the dust evenly over the surface immediately after the grain is loaded into storage. Repeat if necessary. HOW TO APPLY: One convenient way to apply MALATHION 6 - GRAIN PROTECTANT DUST to shelled com and small grains is to treat it when it is in the field wagon or truck prior to binning. Determine the amount in the wagon or truck by multiplying the length by width by depth (all in feet) and multiply this total by 0.8 to get the number of bushols. Measure out the correct amount of MALATHION 6 - GRAIN PROTECTANT DUST and spread evenly over the surface of the grain in the

wagon or truck bed. Cut the dust into the grain with a shovel. The dust will become mixed with the grain as it is havied from the field to the storage bin, and as it is durined from the bed into the auger hopper. Further mixing will occur when the grain is augered or blown into the storage bin. Mixing is completed as the treated grain rolls down the cone shaced pile in the bin. Another method of applying MALATHION 5 - GRAIN PROTECTANT DUST to grain is to evenly meter the correct

amount of dust onto the grain as it is being transferred into storage, using a suitable metering device. Mixing is completed as the grain is transferred into storage and rolls down the cone shaped pile in the bin

STORAGE AND DISPOSAL Do not contaminate water, food or feed by storage or disposal

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved

waste disposal facility. CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

WARRANTY AND LIMITATION OF DAMAGES

Selier warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and Buyer assumes the risk of any use contrary to such directions. Selier makes no other express or implied warranty, including any other express or implied warranty of Fitness or of Merchantability, and no agent of Selier is authorized to do so except in writing with a specific reference to this warranty. In no event shall Selier's Hability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
