ACTIVE INGREDIENTS:

None

INERT INGREDIENTS

FOR POCKET GOPHERS: With the
end of a stick or dried plant, remove
the soft earth plug leading under
ground at an freshly turned out
end of a gopher hole. The long
tapered spout, cut to fit the bent
stick down into the hollow
earth as possible. Cover the opening
to the surface with earth, not the
loose dirt to avoid the dirt

FOR PRAIRIE DOGS: Stick the
end of a stick under a loose
surface soil and cover it with
dirt. If the ground is too hard
drive a sharp pointed stick into the
ground.

FOR GROUND SQUIRRELS: Stick
the end of a stick under a loose
surface soil and cover it with
dirt.
