

DANGER

KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. **Harmful or fatal** if swallowed. Avoid contamination of food.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT. DO NOT REUSE EMPTY DRUM. RETURN TO DRUM RECONDITIONER OR DESTROY BY PERFORATING OR CRUSHING AND BURYING IN A SAFE PLACE AWAY FROM WATER SUPPLIES.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink **promptly** a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

POOL CHLOR

FOR SWIMMING POOL CARE

To establish a chlorine residual, add 1/2 gallon for each 15,000 gallons of water. Repeat dosage until a chlorine residual of 0.6 to 1.0 ppm is established. Add 1 quart for each 15,000 gallons of water daily or as needed to maintain a chlorine residual of 0.6 to 1.0 ppm. Test pool water frequently with a chlorine test kit to maintain the desired chlorine residual. The pool water should be maintained at pH 7.2 to 7.6 as determined by a test kit.

HOW BIG IS YOUR POOL ?

If you do not know the number of gallons of water in your pool, use the following to arrive at an approximate figure.
If your pool is square or rectangular: Length * X Width X Average Depth X 7.5 = total gallons.
If your pool is round: Diameter X Diameter X Depth X 5.9 = total gallons.

*Dimensions in feet.
