

SODIUM HYPOCHLORITE 10%

The germicidal, algaecidal and general oxidizing power of SODIUM HYPOCHLORITE make it an excellent water purification chemical.

WATER PURIFICATION

Proper treatment consists of sufficient chlorination to maintain a residual of 0.2-2.0 parts per million (ppm) free available chlorine, one quart per 10,000 gallons of water should maintain this level. A testing or monitoring system is required to insure satisfactory treatment and to allow for varying dosages to maintain a standard residual.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT. DO NOT REUSE EMPTY DRUM. RETURN TO DRUM RECONDITIONER OR DESTROY BY PERFORATING OR CRUSHING AND BURYING IN A SAFE PLACE AWAY FROM WATER SUPPLIES.

ESTABLISHED 1852

WARNING:

Keep Out of Reach of Children. May be Harmful if Swallowed. Skin and eye contact may cause severe irritation. Avoid contact with skin and eyes. In case of contact flush with plenty of water. Do not use ammonia or other bowl cleaners with this product. To do so will release hazardous gases.

Degrades with age. Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

WARNING!

KEEP OUT OF REACH OF CHILDREN

See FIRST AID and other precautions on side panel.
