

# OB MOSQUITO SPRAY

## FOR OUTSIDE USE AGAINST FLIES, MOSQUITOES, SIMILAR SMALL FLYING INSECTS

#### CONTENTS

ACTIVE INGREDIENTS:	99.37%
Aromatic Petroleum Solvent	81.37
Technical Chlordane*	12.00%
Malathion**	6.00 %
INERT INGREDIENTS:	0.634

\*Consists of Octachloro-4, 7-methanotetrahydroindane and related compounds. \*\*O,O-dimethyl dithiophosphate of diethyl mercaptosuccinate.

#### DIRECTIONS FOR USE

FLIES, MOSQUITOES, SMALL FLYING INSECTS: Mix one part of concentrate with 18 parts of keroscat, diesel oil, fuel oil, or horticultural base oil. Apply as a mist spray or fog. Adjust equipment to deliver 8½ gallons of dilution per acre. Allow fog spray to float down with the wind into tall grass, shrubbery and other such places where insects harbor, alight, or congregate. Do not use on or in such a manner as to contaminate feed and food crops. Repeat application only as necessary to control re-infestation.

CONTROL OF MOSQUITOES: Apply to stagnant pools in intermittently flooded areas, temporary rain pools and sloughs and stagnant waters on idle lands or non-cultivated lands where mosquitoes breed or congregate. Mix 1 quart of concentrate with 6 gallons of kerosene, fuel oil, diesel oil and apply by mist or fog sprayer at rate of 6 gallons dilution per acre. Apply in such a manner as to preclude contamination of lakes, ponds, streams or drainage areas where run-off will contaminate lakes, pools, streams or cultivated lands. Repeat application only as re-infestation occurs.

### CAUTION KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs. Do not use on or contaminate feed and food crops.

Wash hands thoroughly with soap and water after using or handling.

This product is toxic to fish, birds and other wildlife. Keep out of lakes, ponds
