FLY BAIT KILLER

CAMP FLY BAIT KILLER is a ready-to-use, highly effective product that is artistically colored to prevent accidental usage. No mixing, preparation, or application equipment is required. By means of the handy, shaker-top container, merely scatter the bait very lightly on floors, window ledges, or other horizontal surfaces where flies alight or congregate in buildings or garbage areas.

METHOD OF APPLICATION FOR GARAGES AND GARAGE AREAS: Sprinkle liberally around garbage cans and storage areas where garbage and refuse cans are stored. Repeat daily if infestation is heavy. **RE-APPLY** Diazinon Fly Bait Killer after each rainfall.

EXCELLENT FOR: picnic grounds, barns, manure piles, overflowing garbage cans, etc.

APPLICATION RATE: Apply to floors of livestock loading sheds, calf barns, hog pens, etc. at the rate of approximately 4 oz. (1/4 of this package) per 3,000 to 4,000 sq. ft. of floor area. For extremely heavy fly populations, the dosage may have to be increased. Applications should be made daily until the fly population is under control. Then, application should be repeated as necessary.

METHOD OF APPLICATION: The bait should be distributed in several narrow strips rather than broadcast over the entire floor.

FLY BAIT KILLER

CAUTION: Hazardous if swallowed, inhaled or absorbed through skin. Avoid prolonged inhalation and skin contact. Wash hands thoroughly after exposure and before eating or smoking. Burn or bury empty containers—stay out of fumes or smoke.

The Camp Chemical Company, Inc. makes no warranty of any kind concerning the use of this product. The user assumes all risks for use or handling whether or not in accordance with directions on container.

98% reduction of flies each day of application of DIAZINON.

Flies begin to die within 10 to 20 minutes following application.

CAUTION: Do not apply the bait in large amounts at any one place and therefore it will be impossible for domestic animals or livestock to lick up the bait. Do not allow the bait to contaminate livestock feed. Do not apply directly to animals. Do not apply in dairy barns, food processing plants or human dwellings. Keep out of reach of children.

CAUTION

Harmful if swallowed. Keep out of reach of children. Avoid contamination of feed and foodstuffs. Avoid repeated or prolonged inhalation and skin contacts; wash thoroughly after using. Do not use on household pets or humans.

COMBUSTIBLE MIXTURE: Do not use or store near heat or open flame. N. Y. C. Fire Dept. Permit R573729

DIRECTIONS FOR USE

Spray infested surfaces only until wet.

ROACHES, ANTS, WATERBUGS, SILVERFISH, SPIDERS, CRICKETS: Spray thoroughly into all cracks, around baseboards and other places where these insects hide. Also spray until wet, surfaces behind and beneath cabinets, refrigerators, sinks, stoves, etc. Spray other localized areas infested with these pests. Repeat treatment as required.

CARPET BEETLES: Make localized application to areas of the floor and baseboards. Spray directly into cracks and under carpets where insects may be found. Treat crevices, cracks or closets and infested areas of shelvings. Repeat as necessary.

FLIES, MOSQUITOES, WASPS AND FLYING MOTHS OUTDOORS: For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, in garden and other places where these insects alight or aggregate.

BEES, CRICKETS AND ANTS OUTDOORS: For localized application of these insects in outdoor areas where there is no concrete foundation. Infest area thoroughly. Do not over-saturate. Wet hill, and re-spray. Repeat applications as indicated on label and in directions.
