MANUAL TREATMENT

Initial dose: 1 oz. of Aquachlor granules to 5000 gal. of water in pool. Either apply directly by sprinkling into pool or make solution - allow to stand 2 hours - remove excess clear liquid into pool. This will produce required and recommended chlorine residual of 0.6 to 1.0 ppm available chlorine. Repeat during periods of heavy bathing and or concentrated sun. Maintain an available chlorine residual of 0.6 to 1.0 ppm as determined by use of chlorine test kit.

CHLORINATOR TREATMENT

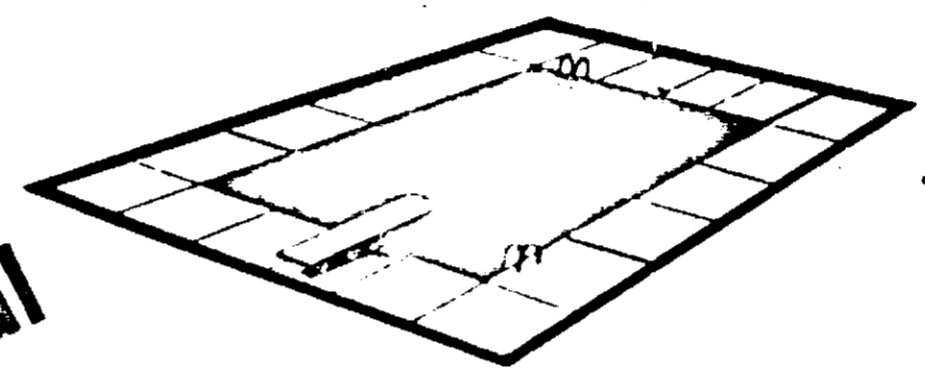

Solution - Add 1/2 lb. of Aquachlor granules in 4 gal. of luke-warm water. Stir well - allow to settle - pour the clear liquid into feeder storage tanks. Use 1/2 gal. 1% solution to each 5000 gallons of water in pool through chlorinator tube intake. Test regularly and add additional solution as required, maintain an available chlorine residual of 0.6 to 1.0 ppm as determined by use of chlorine test kit.

CHILDRENS POOLS

One teaspoonful of Aquachlor Granules to each 1000 gal. pool capacity. Apply as recommended under Manual Treatment schedule. Test regularly with a Camp Pool Test and add additional Aquachlor Granules as required to maintain test strength. Maintain an available chlorine residual of 0.6 to 1.0 ppm as determined by the use of a chlorine test kit.

Federal Laws require labeling any product that contains over 10% available chlorine as a "Poison". However, recommended treatments are not classified as poisonous.

WARNING

May produce severe chemical burns. Do not get on skin or in eyes. In case of skin and eye contact, flush with plenty of water. If irritation persists, get medical attention.

POISON

- ANTIDOTES: Call physician.
- EXTERNAL: Wash parts with water.
- INTERNAL: Drink raw egg white, milk or rice gruel. Follow by emetic. (One tablespoon of mustard in glass of warm water).

Use AQUA-CHLOR GRANULES carefully. Store in a cool dry area. Keep bottle closed when not in use. Keep out of reach of children and away from fire, heat or other combustible materials.
