EPA Reg. No. 1430-74

DIRECTIONS

Use Rapid Algae Cure in conjunction with, not a substitute for, 7 Day Tabs, Super Mini Tabs, Super Granules

Rapid Algae Cure will amaze you with its speedy action. Shut off filter pump and allow water to settle. Do not start pump for 6 hours. Sprinkle generously along the walls where algae appears and over the surface of the water where algae is seen on pool bottom. It will settle through the water and kill the algae in a matter of hours. Two pounds will treat 10,000 gallons of pool water. If entire pool is treated according to above dosage do not use pool for 24 hours. If small patches are treated and less than 1/2 pound per 10,000 gallons is used no restrictions on pool use need be imposed.

CAUTION

Under certain conditions this product, because of its potency, may remove color from vinyl lined and painted pools. Discoloration can be prevented by brushing the granules lightly with a pool brush after they settle to the floor of the pool. The brushing action and movement of the granules distributes the strength so that the full effect is not concentrated on any one spot which may cause bleaching.

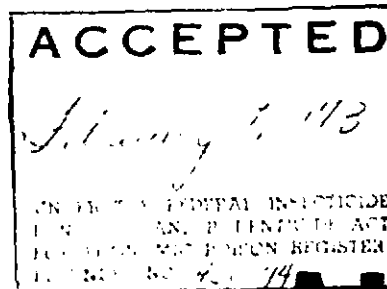

CAUTION

Keep out of reach of children. May be fatal if swallowed. Strong oxidizing material. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Avoid breathing dust. Contact with organic matter may cause fire. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Keep away from open flame. Keep container closed and in a cool dry place when not in use. Rinse empty container thoroughly with water and discard. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as specified on this label.

FIRST AID

EXTERNAL Immediately flush with plenty of cold water.
INTERNAL Feed bread soaked in milk followed by olive oil or cooking oil. CALL A PHYSICIAN.
