

— DIRECTIONS —

ROACHES, ANTS, SILVERFISH. Spray all infested places thoroughly, forcing spray into cracks, crevices, tunnels, wall spaces, behind and underneath shelves in pantries and closets, back of refrigerator, sink and drainboard and localized areas wherever the insects are seen. Spray ants' runways and where they enter the house. Also spray into and around openings to their nests. Contact as many insects as possible. Repeat when necessary.

CARPET BEETLES, BROWN DOG TICKS. Spray along edges and underneath carpets and rugs. Also apply thoroughly into cracks in floor, about edges of room and back of baseboard. Repeat when necessary.

FLEAS, AMERICAN DOG TICKS IN KENNELS: Spray into cracks and crevices and all infested areas. Repeat when necessary. Renew with fresh bedding after treatment.

*COVER OR REMOVE AQUARIA
IN AREAS TO BE TREATED*

DO NOT APPLY TO ANIMALS

— CAUTION —

Repeated or prolonged contact with skin can cause toxic symptoms. Avoid ~~inhalation~~ inhalation or skin contact. In case of spillage on skin, wash with soap and water. Avoid contamination of food-stuffs and feed. Harmful if swallowed. Keep out of reach of children.

Do not use on household pets, humans or plants. Do not spray into or near fire or open flame. Do

This Insecticide Is As Effective Against Roaches as DDT at One-Fifth the Concentration

Active Ingredients 100%

~~Contains a newly discovered chemical of high toxicity to a wide range of insects~~ being

far more effective against roaches as a contact spray than DDT.

THIS ROACH INSECTICIDE is much more effective as a contact spray against roaches than a 5% DDT spray

and much more powerful than the Official Test Insecticide against roaches. It kills by contact and possesses residual insecticidal action for as long as two months on protected non-absorbent surfaces.

KILLS German Roaches, American Roaches, Oriental Roaches, Pharaoh's Ants, Lawn Ants, Carpet Beetles, Household Spiders and Brown Dog Tick. Fleas (larvae and adults) and American
