

Bulab 6016

Half-Ounce Tablets

ACTIVE INGREDIENT:

Trichloro-a-triazinetrione 98.8%

INERT INGREDIENTS 1.2%

This product contains 89% available chlorine.

KEEP OUT OF REACH OF CHILDREN
DANGER

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

FIRST AID: In case of skin contact, brush off excess chemical and flush skin with cold water for at least 15 minutes. If dust gets in the eyes, flush with cold water for at least 15 minutes. See a physician. If swallowed, feed bread soaked in milk, followed by olive oil or cooking oil. Get medical attention immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases, and possible generation of fire/explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Bulab 6016 Half-Ounce Tablets are used to control bacterial, fungal, and algal slimes in water-cooling towers, heat exchangers, evaporative condensers, influent systems, and other parts of commercial and industrial recirculating cooling water systems.

Bulab 6016 Half-Ounce Tablets are dry, white disks, each individually wrapped in plastic. These tablets should be unwrapped at the time of use, not before. The recommended dosage should be added to the cooling tower sump or at other points in the system that will ensure contact with the circulating water and even distribution of the biocide as it dissolves.

Before treatment with Bulab 6016 Half-Ounce Tablets is begun, badly fouled systems should be cleaned to remove algal growth, microbiological slimes, and other deposits. Then, add 3 to 6 of the tablets for each 1000 gallons of water in the system. Repeat daily until control is evident. This condition is usually indicated when a free available chlorine residual of 1 ppm is found 4 hours after treatment. To maintain control, add 1 to 3 tablets per 1000 gallons of water in the system every 1 to 5 days, or as required. These amounts can be raised or lowered as required to maintain control. Simple test kits are available for determining chlorine residuals in the water.

NOV 2 1982

Under the Federal Insecticide,
Fungicide and Rodenticide Act
and the Toxic Substances Control Act

1448-87

STORAGE & DISPOSAL

Keep product dry in tightly closed containers when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material.

Do not reuse empty container. Triple rinse or equivalent and dispose of in a sanitary landfill or by incineration if allowed by state and local authorities.
