DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

B-7-4 is used to inhibit the growth of bacteria in metalworking fluids employed as lubricants or coolants in the machining and processing of metals.

It is recommended that B-7-4 be added to the diluted metalworking fluid at a concentration of .01 to .10 percent based on total weight of the metalworking fluid. Where added to the undiluted metalworking fluid, B-7-4 should be added at a concentration which will provide .01 to .10 percent concentration when diluted with water for use.

Treatment of the diluted metalworking fluid should be repeated every four weeks as long as the metalworking fluid is used. More frequent treatment may be required if excessive contamination occurs.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not stack more than four drums high. Leaking or damaged drums should be placed in overpack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL:
