

BUSAN 1303

BUSAN is a registered trademark.

ACTIVE INGREDIENT(S)

Poly[oxyethylene(dimethyliminio)ethylene(dimethyliminio)ethylene dichloride]	30.0%
INERT INGREDIENTS	70.0%
TOTAL	100.0%

KEEP OUT OF REACH OF CHILDREN CAUTION

FIRST AID

If in Eyes	- Hold eye open and rinse slowly and gently with water for 15-20 minutes. - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. - Call a poison control center or doctor for further treatment advice.
If on Skin, Clothes	- Take off contaminated clothing. - Rinse skin immediately with plenty of water for 15-20 minutes. - Call a poison control center or doctor for treatment advice.
If Swallowed	- Call poison control center or doctor immediately for treatment advice. - Have person sip a glass of water, if able to swallow. - Do not induce vomiting unless told to do so by the poison control center or doctor. - Do not give anything by mouth to an unconscious person.
If Inhaled	- Move person to fresh air. - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. - Call a poison control center or doctor for further treatment advice.
HOT LINE NUMBER	
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. You may also contact 901-278-0330 or 1-800-BUCKMAN for emergency medical treatment information.	

Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

ACCEPTED

MAY 25 2004

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No. 1448-378

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product, if properly used in conjunction with chlorine, will control the growth of algae in swimming pools. This product is designed to be used only with the Purification System(TM) chemical delivery system. For maximum effectiveness pool must be free of algae prior to system start-up.

GENERAL INFORMATION: The pump, filter, time clock, and Purification System all work together to provide a clear, clean algae free swimming pool. For best results, make sure the pump and filter are operating properly and the pool is free from visible algae growth prior to start-up.

Always check the sanitizer level using fresh reagents. Old reagents can give false readings resulting in unsatisfactory results.

This product is compatible with those chemicals normally used to treat swimming pools. The Purification System is designed to reduce the amounts of chemicals normally required to keep a pool in safe sanitary condition and reduce the chemical contact with the pool operator.

Effective in both acid and alkaline pH, this product is designed to be used in pools and pool/spa combinations treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, **DO NOT MIX THIS PRODUCT WITH CONCENTRATED DRY OR LIQUID CHLORINE.**

SYSTEM START-UP: For pools having visible algae growth, brush walls, floors, and stairs to loosen algae. Check sanitizer level using standard sanitizer test kit with fresh reagents. If sanitizer level is outside of the desired range, refer to the Purification System installation and operating instructions for any required adjustments.

POOL CAPACITY: The factory setting on the Purification System allows a 20,000 gallon pool filtering eight hours per day using 1 1/2 hp pump to dispense 32 ounces equally over approximately 30 days. The feeder is designed to deliver between 3.4 and 14 fluid ounces per 20,000 gallons of water per week. If your equipment or filtration time is different, slight adjustments in the feed rate will be necessary. For more detailed instructions refer to the owner's manual that accompanied the Purification System.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not stack more than four drums high. Leaking or damaged drums should be placed in overpack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
