ACTIVE INGREDIENT(S)	
Polyloxyathylana/dimethyliminin/athylana/dimethyliminiolathylana	6.005
dichloride] 5-Chloro-2-methyl-4-leothlezolin-3-one	0.52
MERT INGREDIENTS	93.29
TOTAL	100.00

KEEP OUT OF REACH OF CHILDREN DANGER

	FIRST AID
If in Eyes	- Hold eye open and rinse slowly and gently with water for 15-20 minutes, - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye Call a poison control center or doctor for further treatment advice.
If on Skin, Clothes	- Take off contaminated clothing, - Rinse skin immediately with plenty of water for 15-20 minutes Call a poison control center or doctor for treatment advice.
If Swallowed	- Call poison control center or doctor immediately for treatment advice Have person sip a glass of water, if able to swellow Do not induce vomiting unless told to do so by the poison control center or doctor Do not give anything by mouth to an unconscious person.
lf Inhaled	 Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
	HOT LINE NUMBER
	oduct container or label with you when calling a Poison Control Center or doctor or going for treatment to contact 901-278-0330 or 1-800-BUCKMAN for emergency medical treatment information.
	NOTE TO PHYSICIAN

Precautionary Statements HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Probable mucosal damage may contraindicate the use of gastric lavage.

DANGER: Corrosive, Causes irreversible eye damage. Do not get in eyes or on clothing. Wear goggles, face shield, or safety glasses. Harmful if swallowed or absorbed through skin. Avoid contact with skin, Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals.

Personal Protective Equipment: Applicators and other handlers must wear: coveralls over long-sleeved shirt and long pants, socks and chemical resistant footwear, googles or face shield, chemical-resistant gloves (such as waterproof or rubber gloves). Respirator with an organic vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or NIOSH approval number prefix organic vapor (OV) cartridge or canister with any N.R.P. or HE prefitter. For Cleaning Equipment: chemical-resistant apron. Remove contaminated clothing and wash clothing before reuse.

User Safety Recommendations: User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. User should remove Personal Protective Equipment immediately after handling this product Wash the outside of gloves before removing. As soon as possible wash thoroughly.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Poliutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this pesticide only as specified on the label.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons.

COOLING WATER SYSTEMS: WSKT 10 may be used to control the growth of microorganisms including bacteria, algae, and fungi in recirculating croting water systems. In noticeably fouled systems, WSKT 10 should be added at a dosage rate of 11.8 to 69.6 fluid ounces per 1000 gallons of system water (100 to 600 ppm WSKT 10). Extremely fouled systems should be cleaned to remove excess algal growth, excessive biofilm, and other deposits prior to program initiation. Subsequent additions of 1.16 to 34,8 fluid ounces of WSKT 10 per 1000 gallons of system water (10 to 300 ppm WSKT 10) should be made to maintain control.

AIR WASHER SYSTEMS: WSKT 10 may be used to control microbiological fouling in industrial airwash systems. Extremely fouled systems should be cleaned prior to addition of WSKT 10. When systems are noticeably fouled, WSKT 10 should be added at an application rate of 11.6 to 92.8 fluid ounces per 1000 gallions of system water (100 to 800 ppm WSKT 10) daily until control is evident. Subsequent additions of 11.6 to 58.0 fluid ounces per 1000 gallons of system water (100 to 500 ppm WSKT 10) should be added as needed to maintain control.

METALWORKING FLUID SYSTEMS: WSKT 10 may be used to prevent microbial degradation and fouling in metalworking fluid systems. WSKT 10 should be added tank-side to the system at 23.2 to 232 fluid ounces per 1000 gallons of dilute fluid (200 to 2000 ppm product) as needed to maintain control. Systems with excessive fouling should be cleaned prior to initiating the program,

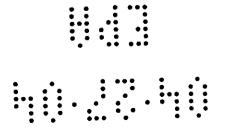

FIRE WATER PROTECTION SYSTEMS: WSKT 10 can be added to help control microorganisms which may foul or cause corrosion in fire water protection systems. WSKT 10 should be added to the system at a point where it will be adequately distributed throughout the system. WSKT 10 should be fed to maintain 200 to 800 pom of product in the system. This will require an initial dose of 23.2 to 92.8 fluid ounces per 1000 gallons of water. Subsequent doses should be evaluated based on microbiological activity and product level testing.

PETROLEUM SECONDARY RECOVERY: WSKT 10 is used to control sulfate reducing bacteria, slime forming bacteria, and fungi in oil field water, polymer or micellar floods, water disposal systems, and other oil field water systems. WSKT 10 is used at concentrations of 100 to 800 ppm (weight/weight) or 11.6 to 92.8 fluid ounces per 1000 gallons of treated water. Additions should be made continuously or intermittently by means of a chemical-metering pump at the free water knockouts, before or after injection pumps and injection well headers. Continuous Feed Method: When system is noticeably fouled, add WSKT 10 at a rate of 100 to 800 ppm (weight/weight) or 11.6 to 92.8 fluid ounces per 1000 gallons of treated water until desired degree of control is achieved. Then treat with 100 to 800 ppm (weight/weight) or 11.6 to 92.8 fluid ounces per 1000 gallons of treated water continuously, or as needed to maintain control. Intermittent Feed Method: When desired, WSKT 10 can be fed directly by a timed chemical-metering pump. The dosage rate and feed time vary according to the degree of fouling, but typically 200 to 800 ppm (weight/weight) or 23.2 to 92.8 fluid ounces per 1000 gallions of water is added to the treated system for 4-8 hours per day, 1-4 times per week, or as needed to maintain control.

ACCEPTED

JUN 30 2004

Under the Federal Insecticide, Funcicide, and Rodenticide Act as amended, for the pesticide, registered under
