1448-422

EPA Req.

Number:

Date of Issuance:

JUL 1 9 2002

NOTICE OF PESTICIDE:

<u>x</u> Registration ____ Reregistration

(under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

DIALD 25

Name and Address of Registrant (include ZIP Code):

Buckman Laboratories, Inc. 1256 North McLean, Boulevard Memphis, TN 38108

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregisteration under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

- 1. Submit and/or cite all data or other material required for registration/reregistration of your product under FIFRA sec. 3(c)(5) or FIFRA sec. 4 when the Agency requires all registrants of similar products to submit such data.
- 2. Add the phrase, "EPA Registration No.1448-422" to your label before you release your product for shipment.

3. Submit five (2) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Marshall Swindell Product Manager 33

roper concentration as the total volume of the system increases with the

WORKOVER FLUIDS

Calculate the total volume of the workovi DIALD 25 needed.

system and, using this volume, calculate the number of gallons of

Use up to 2000 ppm of DIALD 25, depending on the severity of the bacterial contamination. For example, 7.6 gai DIALD 25 per 100 barrels (4,200 pellons) of fluid will provide this dilution.

Add DiALD 25 into the system

Circulate the workover fluid system until the fluid returns clear. Shut the system down and idle for several hours.

Remove the workover fluid. This well should be ready for productive use

PAPER MILLS AND PAPER MILL PROCESS WATER SYSTEMS

DIALD 25 should be added to papermaking systems at a point of uniform mixing, such as the beaters, broke chest pump, save-all tank, or white water tank.

Initial Treatment: When the water is noticeably contaminated, add 1.0-6.0 lbs per ton of pulp or paper (dry basis) as a stud dose. Repeat until control is achieved. Heavily-fouled systems should be cleaned prior to initial treatment. Subsequent Dose; When microbial control is evident add 0.6-4.0 lbs per ton to pulp or paper (dry basis) as a slug dose as necessary to maintain control.

PIGMENTS AND FILLER SLURRIES FOR FOOD-CONTACT PAPER AND PAPERBOARD

To inhibit the growth of spoilage microorganisms during manufacture, storage and distribution of pigments and filter sturries such as kaptin, calcium carbonate and titanium dioxide.

Add sufficient quantities of DIALD 25 to produce a concentration of 200-1200 ppm by weight of the formulation slurry (2.0-12.0 fbs of product per 10,000 lbs of slurry).

WATER-BASED COATINGS FOR NON-FOOD-CONTACT PAPER AND PAPERBOARD

To inhibit the growth of spoilage microorganisms during manufacture, storage and distribution of water-based coatings for use on non-food-contact paper and paperboard.

Add sufficient quantities of DIALD 25 to produce a concentration of 200-1200 ppm by weight of the formulation slurry (2-12 lbs of product per 10,000 lbs of slurry).

CONDITIONS OF SALE

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be tollowed carefully. However, it is impossible to eliminate all risk inherently associated with use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of the Seller. All such risks shall be assumed by the Buyer. The manufacturer warrants that this product conforms to the Chemical description on the label and is reasonably fit for the purposes referred to above.

THE MANUFACTURER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

The manufacturer offers this product, and the Buyer and User accept it, subject to the forecasing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative.
