

ACTIVE INGREDIENT:		
Glutaraldehyde	15.0%	
INERT INGREDIENTS:	85.0%	
TOTAL	100.00%	

DANGER

FIRST AID	
 Call poison control center or doctor immediately for treatment advice. DO NOT INDUCE VOMITING. Do not give anything to drink. 	
 Wash immediately and continuously with flowing water for at least 30 minutes. Remove contact lenses after the first 5 minutes and continue washing. Obtain prompt medical consultation, preferably from an opthalmologist. Call a poison control center or doctor immediately for treatment advice. 	
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15~20 minutes. Call a poison control center for treatment advice.	
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.	

HOT LINE NUMBER

Have the product container or label with you when calling a Poison Control Center or doctor, or going for Ireatment. You may also contact 901-278-0330 or 1 800 BUCKMAN for emergency medical treatment information.

NOTE TO PHYSICIAN

Aspiration may cause lung damage. Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Corpside. Causes irreversible eye damage. Causes skin irritation. Harmful if inhaled. Harmful if swallowed Harmful! I absorbed through skin. Prolonged or frequently repeated skin contact may cause altergic reactions in some individuals. Causes asthmatic signs and symptoms in hyper-reactive individuals. Do not get in cyas, en-s'din, on clothing. Avoid breathing vapor. Do not swallow. Wear goggles, protective clothing, and butyl or nitrile gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

- ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish Do not discharge effluent containing this product into takes, streams, ponds, estuaries, because or other waters unless in accordance with the requirements of a National Pollutant Uischarge Filmination System (NPDES) permit, and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND HANDLING

DIALD 15P is incompatible with many commonly used materials of construction such as steef, galvanized iron, aluminum, tin, and zinc. DIALD 15P can be stored and handled in baked phenolic-lined steef, polyethylene, stainless steef, or reinforced epoxy-plastic equipment. This product freezes at about 20.3°F (-6.5°C). Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage times (up to about 1 month), temperatures of up to 100°F (37.8°C) can be tolerated but the preferred maximum storage temperature is about 80°F (26.7°C).

A stainless steel centrifugal pump is suggested for transfer service. Spiral-wound stainless steel with TEFLON® Polymer is suitable for gaskets and packing.

Handle in a well-ventilated area. If vapors are irritating to the nose or eyes, special ventilation or respiratory protection (MSHA/NIOSH approved air purifying respirator equipped with an organic vapor cartridge) may be required.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PAPER MILLS AND PAPER MILL PROCESS WATER SYSTEMS: DIALD 15P should be added to paper making system at a point of uniform mixing such as the beaters, broke chest pump, save-all tank, or white-water tank. Initial Dose: When the system is noticeably contaminated, add 1.7–9.9 tos of DIALD 15P per ton of pulp or paper (dry basis) as a slug dose. Repeat until control is achieved. Heavily-fouled systems should be boiled out prior to initial treatment. Subsequent Dose: When microbial control is evident add 1.0–6.6 lbs of DIALD 15P per ton of pulp or paper (dry basis) as a slug dose as necessary to maintain control.

PIGMENTS AND FILLER SLURRIES FOR PAPER AND PAPERBOARD: (For use in food and non-food contact pigments and filler slurries). Use from 0.33 to 2.0 lbs of DIALD 15P per 1,000 lbs dry powder to produce a concentration of 333 to 2,000 ppm as product (based on slurry solids) in the mixed slurry.

WATER-BASED COATINGS FOR PAPER AND PAPERBOARD: (For use in non-food contact coatings only). Use from 0.33 to 2.0 lbs of DIALD 15P per 1,000 lbs dry powder to produce a concentration from 333 to 2,000 ppm as product (based on slurry solids) in the mixed slurry.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or your Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Metal Containers or Plastic Containers: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or other procedures approved by state and local authorities. Plastic Containers: May be incinerated, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke. Metal Containers: Must not be incinerated. Do not cut or weld on or near metal containers.
