

Dazzle swimming pool algaecide

DIRECTIONS

INITIAL APPLICATION To a cleaned pool add one gallon to 50,000 gallons of water, or ratio thereof.

MAINTENANCE DOSE: Use one quart per 50,000 gallons of water every 7 days. When weather is hot or bathing load is heavy, use this dosage or as necessary.

BOOSTER DOSE: Immediately after every rain, add one quart per 50,000 gallons of water as above.

IMPORTANT: Follow above directions without fail, even when used. Algae growth must be fought at all times.

POOL-SIDE SURFACES: After cleaning surfaces, use one ounce to four gallons of water for sanitizing or one ounce to two gallons of water for disinfecting. With these solutions, wipe, mop, or scrub wet surfaces thoroughly.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probably mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, as well as oxygen and measure to support breathing manually or mechanically may be needed.

DO NOT REUSE CONTAINER. DESTROY WHEN EMPTY.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water.

Apply this product only as specified on this label.

J. L. PRESCOTT CO., PASSAIC, N.J. 07055 MFR.

Dazzle

algaecide is efficient, economical and stable in use dilution.

Dazzle

is compatible with all chemicals used in pool water and will not damage tile, concrete, metal or plastics.
