

[1455-18]

Product No. 756

DIRECTIONS

VAPOCIDE is a highly concentrated contact insecticide for use primarily in thermal fog generators such as Dynafog and BVI for smoke fogging and with the Atomist, Challenger or Microsol as a wet mist vapor. Use in Flour Mills, Bakeries, Dairies, Canneries, Food Processing and Bottling Plants, Warehouses, Super Markets, Restaurants and other establishments where food is processed or stored. Kill exposed adult stages of flying insects such as flies, mosquitoes, gnats, flour moths, exposed roaches (waterbugs), silverfish, spiders and fleas when used as directed.

DIRECTIONS: Thoroughly clean area to be fogged by removing accumulation from cracks, corners and around all equipment. Do not dilute VAPOCIDE.

SPACE SPRAYING WITH DYNALOG or BVI: For flies, mosquitoes, gnats, flour moths and other flying insects, fog 1/2 pint VAPOCIDE per 20,000 cubic feet of space. To kill accessible crawling insects such as roaches, silverfish, crickets, fleas and similar insects, fog 1 pint per 20,000 cubic feet.

SPACE SPRAYING WITH ATOMIST, CHALLENGER, ETC.: For flying insects, fog 1 pint per 20,000 cubic feet of space. To kill accessible crawling insects such as roaches, waterbugs and similar insects, atomize 1 quart VAPOCIDE per 20,000 cubic feet of space. Keep doors and windows closed for at least 20 minutes to obtain maximum results. Fallen insects should be disposed of as soon as possible after spraying. Repeat application as often as necessary. Foods should be removed or covered during the treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Apply as a space spray only when the food processing plant is not in operation.
