

HOW TO USE FORDHAM

PURPOSES

This Disinfectant is especially prepared for general disinfecting and cleansing purposes in public buildings, public institutions, school-houses, churches, theatres, restaurants, hotels, railway cars, steamships, clubs and private dwellings.

DILUTION

For general disinfecting and cleansing purposes, use 100 parts of water to one part of the disinfectant. When preparing the solution, pour the disinfectant into the receptacle first, then add water and stir well. Lukewarm water gives the best results. Never use boiling water.

APPLICATION

It is preferable to apply the solution with a mop, but can be used with rags or cloths, which can be wrung out, as the solution is not injurious to the hands. When used according to directions, this Disinfectant is non-corrosive and non-caustic, and disinfects, deodorizes, and cleanses, all in one operation.

MORE ABOUT FORDHAM

FORDHAM'S PINE TREE DISINFECTANT

Contains a lesser percentage of Pine Oil but fortified with synthetic phenols to a phenol coefficient of 5. Has a wider range of germ killing properties than regular Pine Oil Disinfectant but does not leave as strong an odor of Pine. Is effective against Staphylococcus Aureus and E. Typhi.
