EVER PREEN™

FOR EVERGREENS AND AZALEAS

This 2-way product (1) feeds with a 12-16-8 plant food, specially formulated for acid-loving plants and shrubs, (2) prevents broad-leaf and grassy weeds* from sprouting in planting beds. Safe for established evergreens and shrubs. Do not apply to Ajuga, Myrtle, Pachysandra, and other ornamental groundcovers as injury may result.

Apply in spring as evergreen and shrub growth begins and before weeds sprout. For best results, follow these directions carefully.

1. Before applying, remove all existing broadleaf and grassy weeds since product kills sprouting seeds, not established weeds.
2. Punch handy perforations under pull-tab on side for easy spreading, or pour from spout into smaller container for spreading.
3. Spread EVER PREEN evenly. Avoid missing small areas since weeds will grow in spots not covered. Working product into soil lightly gives maximum weed control and fertilizer activity.
4. Contents of this package will cover 400 sq. ft. of soil area. A second application should be made 4 weeks later for continued weed control.
5. After application, sprinkle shrubs lightly with water to remove any of the product from foliage.

*Crabgrass, goosegrass, barnyard grass, foxtail, annual bluegrass, stinkgrass, carpetweed, chickweed, knotweed, pigweed, lambsquarters, purslane.

CAUTION: Avoid prolonged or repeated inhalation of dust or contact with skin. Avoid contamination of foodstuffs, feeds, and fish ponds. Wash thoroughly after using. This product is for use with ornamental plants only. Do not use on vegetables or other edible plants.

The manufacturer makes no warranties, express or implied, concerning this product or its use, which extend beyond the description on the face hereof. All statements made concerning this product apply only when used as directed.
