## FOR EVERGREENS AND AZALEAS

This two-way product (1) feeds with a 12-16-8 plant food, specially formulated for acid-loving plants and shrubs. (2) prevents broadleaf and grassy weeds\* from getting started in planting beds. Safe for established evergreens and shrubs. Do not apply to Ajuga, Myrtle, Pachysandra, and other ornamental groundcovers as injury may result.

Apply in spring as evergreen and shrub growth begins and before weeds sprout. For best results, follow these directions carefully.

1. Before applying, remove all existing broadleaf and grassy weeds since product kills sprouting seeds, not established weeds.
2. Spread EVER PREEN evenly. Avoid missing small areas since weeds will grow in spots not covered. Working product into soil lightly gives maximum weed control and fertilizer activity.
3. Contents of this bag will cover 2000 sq. ft. of soil area. A second application should be made 4 weeks later for continued weed control.
4. After application, sprinkle shrubs lightly with water to remove any of the product from foliage.

\*Crabgrass, goosegrass, barnyard grass, foxtail, annual bluegrass, stinkgrass, carpetweed, chickweed, knotweed, pigweed, lambsquarters, purslane.
