

DANDELION WEED KILLER

Kills the following broadleaf weeds with powerful 2,4-D and silvex combination:

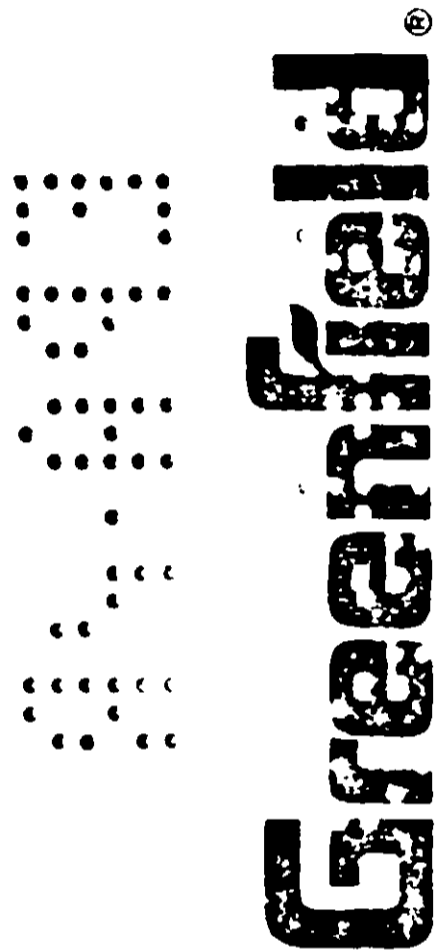

Common Chickweed	Docks	Ground Ivy	Annual Morning Glory	Broadleaf Plantain	Spotted Saurge
Cinquefoil	Dandelion	Henbit	Oxalis	Buckhorn Plantain	Thistles
Clovers	Field Bindweed	Knotweed	Pennywort	Purslane	Many Others

APPLY ANYTIME during the growing season for broadleaf weed control. For best results apply when weeds are still small and most easily killed, when temperature is moderately cool (never above 85°F), when there is little or no wind and no rain is expected for 6-8 hours.

HOW TO APPLY: Follow directions for best results

1. Measure lawn area to be treated. Apply evenly at the rate of one bag for each 5,000 sq. ft.
2. Apply with **GREENFIELD Model 105** Spreader opening set at 7.
3. **IMPORTANT:** Apply when grass is moist (after a rain, sprinkling or dew). Do not water lawn after material is applied. Watering will wash off weed killing material.
4. For most effective results, avoid unnecessary disturbance of treated areas for 48 hours after application.

NOTE—May damage bentgrasses, St. Augustine, centipede, carpetgrass, clover and dichondra—also grass seedlings of newly seeded lawn.

Greenfield®

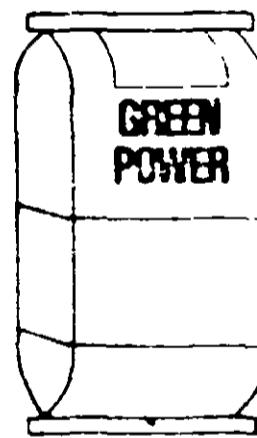

SPREADER SETTINGS

The settings listed below are calculated to apply **GREENFIELD DANDELION AND BROADLEAF WEED KILLER** at the recommended rate. These settings are approximate. Check application rate of your spreader before applying. Settings vary with type, age and condition of spreader.
