### Directions for Use

Read All Directions Carefully Before Applying

**Pipron® for the Control of Powdery Mildew**  
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling  
Do not enter treated areas without protective clothing until sprays have dried

**Reentry Statement:** Because certain states may require more restrictive re-entry intervals for various crops treated with this product, consult your State Department of Agriculture for further information

Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product (Indicate specific oral warnings which inform workers of areas or fields that may not be entered without specific protective clothing, period of time field must be vacated and appropriate actions to take in case of accidental exposure.) When oral warnings are given, warnings shall be given in a language customarily understood by workers. Written warnings must include the following information  
**CAUTION:** Area treated with Pipron on (date of application) Do not enter without appropriate protective clothing until sprays have dried. In case of eye contact, immediately flush eyes with plenty of water and get medical attention. In case of skin contact, immediately flush skin with plenty of water. If skin irritation develops and persists, get medical attention.

Pipron is a fungicide that is highly effective against powdery mildew-causing fungi attacking rose, lilac, dahlia, phlox, zinnia, chrysanthemum, catalpa. Used as directed, Pipron will not harm foliage or floral tissue.

### Application Directions

Pipron liquid concentrate is to be mixed with water and applied as a spray to the foliage of ornamental plants. Sufficient pressure should be used in spraying Pipron to ensure thorough coverage of all plant surfaces. Special care should be taken to thoroughly wet new terminal growth and plant areas already diseased with powdery mildew

**Mixing:** Pour the recommended amount of Pipron into the spray tank during filling and mix thoroughly before spraying

**Rates and spraying schedule:** To control powdery mildew, add 1/4 pint of Pipron liquid concentrate to each 100 gallons of water. For smaller amounts mix 1/2 ounce with 12 gallons of water. Begin spraying soon after the first leaves expand or the first symptoms of powdery mildew appear

If powdery mildew is already present, make an initial application of 1/2 pint of Pipron in 100 gallons of water. For smaller initial amounts mix 1/2 ounce with 6 gallons of water. Then follow with sprays of 1/4 pint of Pipron in 100 gallons of water every seven to ten days, or as needed

### Precautionary Statements

#### Hazards to Humans and Domestic Animals

#### CAUTION

May be harmful if swallowed. If swallowed, consult a physician. Avoid contact with skin and eyes. Wash thoroughly with soap and water after use. If splashed into eyes, wash with generous amounts of water.

Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons.

#### Environmental Hazards

Avoid contamination of foodstuffs, feeds and fishponds. This product is toxic to fish. Do not apply directly to water.

The manufacturer makes no warranties, express or implied, concerning this product or its use, which extend beyond the description on the label. All statements made concerning this product apply only when used as directed.
