TREFLAN 5G[®] Preplant Soil Incorporated In The Fall
For Weed Control In Flax

DIRECTIONS FOR USE

TREFLAN 5G is recommended for weed control as a fall applied soil incorporated treatment prior to seeding flax the following spring.

Soil Preparation

TREFLAN 5G may be applied to standing stubble from a harvested crop and incorporated for weed control in spring seeded flax.

Application Rates

Apply TREFLAN preplant to flax at the following broadcast rates per acre.

<u>Soil Texture</u>	<u>Fall Application^{a/} (Pounds)</u>
Coarse (sand, loamy sand, sandy loam)	10
Medium (loam, silt loam, silt, sandy clay loam ^{b/} , silty clay loam ^{b/})	15
Fine (clay, clay loam, silty clay, sandy clay, sandy clay loam ^{b/} , silty clay loam ^{b/})	20

^{a/} Apply and incorporate between September 1 and soil freeze-up.

^{b/} Sandy clay loam and silty clay loam are transitional soils which may be classified as either medium- or fine-textured soils.

Application

ALST DOCUMENT AVAILABLE

Apply TREFLAN with a properly calibrated herbicide applicator that will apply the granules uniformly. Calibrate the applicator according to the manufacturer's directions and check frequently during application to be certain that equipment is
