

Weeds Controlled

Broadcast Application Rates

Short-term control (4 months)—For all soil textures, apply 2 $\frac{2}{3}$ pounds per acre to control the following weeds:

Annual grasses

Barnyardgrass
Crabgrasses
Foxtails
Goosegrass
Johnsongrass (from seed)
Fall panicum
Brachiaria (signalgrass)
Crowfootgrass
Wild Oat

Broadleaf Weeds

Common chickweed
Common purslane
Carpetweed
Florida purslane
Lambsquarters
Pigweed (carelessweed)

Long-term control (6 to 8 months)—For all soil textures apply 5 $\frac{1}{3}$ pounds per acre to control the following weeds:

Annual grasses

Barnyardgrass
Crabgrasses
Wild Oat

Broadleaf Weeds

Common chickweed
Common purslane
Lambsquarters
Pigweed (carelessweed)

Surflan* is not recommended for use on soils containing more than 3% organic matter.

General Directions

Surflan 75W is a surface-applied pre-emergence herbicide which provides long lasting control of a wide range of annual grasses and broadleaf weeds. It does not control established weeds. Therefore, areas to be treated should be free of established weeds. Weed residues, prunings, or trash should be thoroughly mixed into the soil or removed before applying Surflan. The soil should be in good tilth and free of clods at the time of application. One-half inch rain or its equivalent in sprinkler irrigation is necessary to activate Surflan. Shallow cultivation (1 to 2 inches) will not reduce herbicidal effectiveness. The ornamental species in which Surflan 75W can be used at recommended rates are listed on the side panel.

Application Directions

Apply Surflan 75W as a directed spray to the soil surface in 20 to 40 gallons of water per acre using only a properly calibrated, low pressure herbicide sprayer that will apply the spray uniformly. Add the recommended amount of Surflan 75W to clean water in the spray tank during the filling operation. The sprayer should be checked daily to insure proper calibration and uniform application. Agitate thoroughly before and during application with bypass agitation.

PRECAUTION

Apply only to established plantings. Poor weed control may result if directions are not followed. Over application may result in crop injury or excessive soil residue.

Destroy Empty Container. Do Not Reuse.
