

This use must be presented as a Supplemental Label and furnished to the government agency.

SPIKE 20P (E.P.A. REG. NO. 1471-123)

FOR USE BY FEDERAL GOVERNMENT AGENCIES FOR  
THE GROUND OR AERIAL APPLICATION OF SPIKE 20P  
TO CONTROL BRUSH AND WOODY PLANTS

#### General Use Information

Spike 20P may be broadcast applied by ground or air by/or under the supervision of U.S. Government agencies. Spike 20P may be applied using ground or aerial equipment properly calibrated to provide an accurate and uniform distribution of pellets. Use of equipment not properly calibrated or designed to confine the spread of Spike 20P to the target area may result in injury or death of desirable plant species and unsatisfactory brush or woody plant control.

Spike 20P may be applied as a spot treatment to control individual or scattered clumps of brush. Refer to the Spike 20P label for spot application directions.

Spike 20P may be applied for the control of brush and woody plants on sites listed on the product label. Lower than recommended rates may be used if partial control is desired.

Read the Spike 20P label for directions for use, precautions, and limitations.

SPIKE 20P® - tebuthiuron, Elanco Products Company
