

PRECAUTIONS

Applied according to these directions and under normal growing conditions, TREFLAN will not adversely affect onions. Diseases, improper incorporation depth, excessive moisture, high salt concentration or drought may weaken the crop and increase the possibility of damage from TREFLAN. Under these conditions, delayed crop development or reduced yields may result. Refer to the TREFLAN label for additional warnings and cautions before use.

Dear Mr. Hill:

Subject: Movement of Use in Onion Fields
Trellan 100
EPA Registration No. 107-100
Trellan 100-50
EPA Registration No. 107-100
Trellan Pro 5
EPA Registration No. 107-100
Your submission dated December 8, 1961

The amendment received to date, in connection with registration under FIFRA sec. 3(c)(7)(B), is acceptable, provided that you:

1. Submit major data required for registration/re-registration of your product under FIFRA sec. 3(c)(7) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed herein before you release the product for shipment bearing the amended labeling:
 - a. Restrict use to onions grown for dry bulbs only and add a 60-day preharvest interval.
 - b. Submit data in support of your restriction to dry, before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 3(c). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A striped copy of the label is enclosed for your review.
