HEPTACHLOR^{EC}24

EMULSIFIABLE CONCENTRATE

FOR **PCO'S**

WARNING
Keep Out of the Reach of Children

Net Contents _____
Formulated For and Sold Exclusively To:

Contains 2 lbs. Heptachlor per gallon. Heptachlor EC-24 is an emulsifiable insecticide containing 2 pounds of actual Heptachlor per gallon at 60°F. A water-stable emulsion of desired strength can be prepared easily and can be used in conventional hydraulic sprayers or low-volume ground applicators.

ACTIVE INGREDIENTS	
Heptachlor*	24.09%
Related Compounds	8.91%
Petroleum Hydrocarbons	62.50%
INERT INGREDIENTS	
	4.50%
TOTAL	100.00%
*Heptachlorotetrahydro -4,7-methanoindane U.S.D.A. Registration No. 1526-470	

MIXING INSTRUCTIONS
Add 2 1/2 gallons of Heptachlor EC-24 (2 lbs. actual Heptachlor) to 120 gallons of water to form an 0.5% emulsion.

WARNING
May be fatal if swallowed. Do not breathe vapor, dust or spray mist. Do not get on skin. In case of contact, wash immediately with soap and water. Do not contaminate feed and foodstuffs. Do not feed animals from distillers' waste empty.

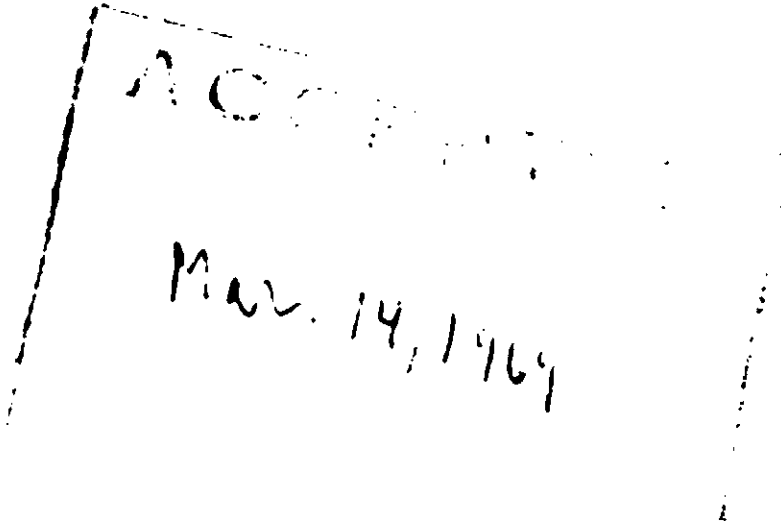

ANTIDOTE
External — in case of splash on skin, wash promptly with copious amounts of water.
Internal — In case of ingestion, give 1-2 glasses of water. Administer activated charcoal 50 grams per 100 ml of water. If vomiting occurs, do not induce. **CALL A PHYSICIAN IMMEDIATELY!**
This product is toxic to fish and aquatic life. Do not use in streams and ponds. Do not use on lawns, lawns, lawns, lawns. Children and pets should be kept off treated areas until the water has evaporated and dried. Do not use on lawns, lawns, lawns, lawns. Do not use on lawns, lawns, lawns, lawns. Do not use on lawns, lawns, lawns, lawns. Do not use on lawns, lawns, lawns, lawns.

DIRECTIONS PUBLIC HEALTH INSECT CONTROL

Insect	Dosage/ Acre of actual Heptachlor	Gallons/ Acre of 0.5% Emulsion	Treatment Information
Mosquito Larvae	.05-.1 Lb.	1.2-2.4	Apply .05-.1 Lb. Heptachlor per acre as required. A more diluted emulsion than 0.5% may be used if necessary for this particular treatment. (1 gallon of 0.5% emulsion to 10 gals. water — then use at rate of 12-24 gallons per acre.)

Insect
Roaches (Waterbugs)
Ants
Silverfish and Firebrats
Flies, Mosquitoes, Wasps

Keep children and pets off and grass is dry. Do not use on lawns, lawns, lawns, lawns. **1 — Slab-Type Construction**
(a) Apply 1 gallon per 10 square feet under the slab and along all utility entrances.
(b) Apply 2 gallons per 5 square feet construction treatment, around utility entrances.
2 — Building With Crawlspace
(a) Apply 2 gallons per 5 square feet walls, including entrance more than 15-18 inches under the house, apply 4 gallons the footing.
(b) Apply 2 gallons per 5 square feet under the house, such as piers and utility entrances 30 inches, apply 4 gallons the footing.
(c) Apply 1 gallon per 10 square feet where the attachment have covering slab on top of the foundation.
(d) Apply 1 gallon per 5 square feet of the foundation.
3 — Buildings With Basements
(a) Apply 1 gallon per 10 square feet under the basement floor, entrances, and similar openings.
(b) Apply 2 gallons per 5 square feet walls, including entrance more than 15-18 inches under the house, apply 4 gallons per 5 lineal feet under the house, such as piers, if 15 inches, apply 4 gallons the footing.
(c) Apply 2 gallons per 5 square feet under the house, such as piers, if 15 inches, apply 4 gallons the footing.
(d) Treat all voids in hollow masonry at rate of 1-2 gallons per 5 lineal feet. Premises treated with 0.5% of five years.

HEPTACHLOR^{EC}24

EMULSIFIABLE CONCENTRATE

FOR PCO'S

WARNING
Keep Out of the Reach of Children

Net Contents _____
Formulated For and Sold Exclusively To:

Contains 2 lbs. Heptachlor per gallon. Heptachlor EC-24 is an emulsi-
fiable insecticide containing 2 pounds of actual Heptachlor per
gallon at 60°F. A water-stable emulsion of desired strength can be
prepared easily and can be used in conventional hydraulic sprayers
or low-volume ground applicators.

ACTIVE INGREDIENTS	
Heptachlor*	24.09%
Related Compounds	8.91%
Petroleum Hydrocarbons	62.50%
INERT INGREDIENTS	
	4.50%
TOTAL	100.00%
*Heptachlorotetrahydro-4,7-methanoindane U.S.D.A. Registration No. 1526-470	

MIXING INSTRUCTIONS

Add 2 1/2 gallons of Heptachlor EC-24 (2 lbs. actual Heptachlor) to
120 gallons of water to form an 0.5% emulsion

WARNING

May be fatal if swallowed. Do not breathe vapor, dust or spray mist.
Do not get on skin. In case of contact, wash immediately with soap
and water. Do not contaminate feed and foodstuffs. Do not reuse
containers. Destroy when empty.

ANTIDOTE

External — In case of spillage on skin, wash promptly with soap and
water.

Internal — Give one tablespoonful of mustard in glass of water. Also
give a tablespoonful of salt in glass of warm water. Repeat until
vomit fluid is clear. Keep victim prone and quiet. CALL A PHYSICIAN
IMMEDIATELY.

This product is toxic to fish and wildlife. Birds feeding on treated
areas may be killed. Keep out of lakes, streams and ponds. Apply
only as spot treatment in home. Keep children and pets off treated
areas until this material is washed into soil and grass is dry. Do
not contaminate water by cleaning of equipment or disposal of
wastes. Apply this product only as specified on this label.

**DIRECTIONS
PUBLIC HEALTH INSECT CONTROL**

Insect	Dosage/ Acre of actual Heptachlor	Gallons/ Acre of 0.5% Emulsion	Treatment Information
Mosquito Larvae	.05-.1 Lb.	1.2-2.4	Apply .05-.1 Lb. Heptachlor per acre as required. A more diluted emulsion than 0.5% may be used if necessary for this particular treatment. (1 gallon of 0.5% emulsion to 10 gals. water — then use at rate of 12-24 gallons per acre.)

**HOUSEHOLD INSECT CONTROL
USE 0.5% EMULSION ON ALL LISTED
Apply Only As Spot Treatment In Home**

Insect	Treatment Information
Roaches (Waterbugs)	Thoroughly spray infested cracks, hiding places and adjacent exposed surfaces where they crawl.
Ants	Spray trails and areas around door sills and window frames.
Silverfish and Firebrats	Spray baseboards, areas behind shelving, book cases and storage areas.
Flies, Mosquitoes, Wasps	Spray surfaces such as doors, around windows and areas frequented by these pests. Also treat window frames, door sills, etc.

**TERMITE CONTROL
Use an 0.5% emulsion**

Keep children and pets off treated areas until this material is washed into soil
and grass is dry. Do not contaminate water by cleaning of equipment or disposal
of wastes. Apply this product only as specified on this label.

- 1 — Slab-Type Construction**
 - (a) Apply 1 gallon per 10 square feet as an overall pre-construction treatment
under the slab and along attached porches or entrance platforms.
 - (b) Apply 2 gallons per 5 lineal feet to critical areas under the slab as pre-
construction treatment, such as along the inside of the foundation walls and
around utility entrances and interior partition foundation walls.
 - 2 — Building With Crawl Spaces**
 - (a) Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation
walls, including entrance platforms and porches where the foundation is not
more than 15-18 inches deep. If over 15-18 inches deep but not over 30
inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of
the footing.
 - (b) Apply 2 gallons per 5 lineal feet as a trenching application to critical areas
under the house, such as along the inside of foundation walls and around
piers and utility entrances. If trench is deeper than 15-18 inches but not over
30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top
of the footing.
 - (c) Apply 1 gallon per 10 square feet of soil surface as a pre-construction treat-
ment where the attached porches, entrance platforms, utility entrances, etc.,
have covering slab on fill of ground.
 - (d) Apply 1 gallon per 5 lineal feet of wall to voids in hollow masonry units
of the foundation.
 - 3 — Buildings With Basements**
 - (a) Apply 1 gallon per 10 square feet as an overall pre-construction treatment
under the basement flooring, attached porches, entrance platforms, utility
entrances, and similar situations where slab fill is at ground level.
 - (b) Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation
walls, including entrance platforms and porches where the foundation is not
more than 15-18 inches deep. If over 15-18 deep but not over 30 inches, apply
4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.
 - (c) Apply 2 gallons per 5 lineal feet as a trenching application to critical areas
under the house, such as along the inside of foundation walls, porches,
entrances and piers. If trench is deeper than 15-18 inches but not over 30
inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of
the footing.
 - (d) Treat all voids in hollow masonry units of the foundation at the rate of 1
gallon per 5 lineal feet of wall.
- Premises treated with 0.5% Heptachlor will give residual control for a minimum
of five years.
