Ms. Dee Guerrin
W.F. Young, Inc.
111 Lyman Street
Springfield, MA 01103

Dear Ms. Guerrin:

Subject; Amendment - Label
Absorbine Flys-X Ready To Use Insecticide
EPA Registration No. 1543-10
Your Submission dated January 30, 1996

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. Three copies of the finished labeling must be submitted prior to releasing the product for shipment.

We cannot accept the addition of the picture of the "pyrethrin plant" to the label for the following reasons:

1. The picture is misleading, since it gives the impression that the product is derived solely from the plant, when in fact the product's ingredients are a combination of both botanicals and other chemicals. On the other hand, we have no objection to the addition of the following statement to the label.

....."Contains Botannically derived Insecticide".....

2. Pyrethrin is extracted from various species of chrysanthemum plants. There is no such thing as a pyrethrin plant.

Sincerely yours,

RPK

Richard P. Keigwin, Jr.

EFFECTIVE, FAST-ACTING, READY TO USE INSECTICIDE.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

HORSE AND LIVESTOCK SPRAY

Effective, fast acting, ready to use insecticide. Apply with conventional sprayers or a cloth.

To protect cattle and horses from horn flies, house flies, mosquitoes and gnats, apply a light mist sufficient to wet the surface of the hair.

To control stable flies, horse flies, and deer flies, apply at a rate of 2-4 ounces per adult animal sufficient to wet the hair thoroughly. Repeat treatment daily or at intervals necessary to give continued protection.

To control face flies, apply with a cloth dampened with the spray. To control blood sucking lice, apply to the infested areas of the animal.

Use a stiff brush to get the spray to the base of the hair. Repeat every 2-3 weeks if required.

PET INSECTICIDE

For control of fleas and brown dog ticks on premises and on pets. Effective, fast acting insecticide.

Surface spraying: Thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames and entire areas of floor covering. Fresh bedding should be placed in animal quarters following treatment. Repeat treatment as needed.

On Pets: Start spraying at the tail, moving the dispenser rapidly and making sure the animal's entire body is covered including the legs and under body. While spraying, buff the hair so spray will penetrate to the skin.

Do not spray into eyes or face. Avoid contact with genitals. Repeat as needed.

HOUSEHOLD SPRAY

Effective fast acting ready to use spray for use in homes. Leaves no oily or objectionable residues.

Indoor Application: Use of this product in food processing areas should be limited to periods when the kitchen is not in operation.
