Dear Ms. Chartier:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notices 98-10 and 2001-6 dated June 14, 2010 for the following product(s):

WFY0301

EPA Reg. No. 1543-15

The Registration Division (RD) has conducted a review of this request for applicability under PRN's 98-10 and 2001-6 and finds that the label change(s) requested falls within the scope of PRN 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact Regina Foushee'-Smith at 703-605-0780.

Sincerely,

NOTIFICATION

Dear Mr. Gebken:

W. F. Young, Inc. is submitting this notification for the product WFY0301 EPA Reg. No. 1543-15. This notification consists of a label change adopting the exact wording set forth in PR Notice 2001-6. It also includes a packaging change consistent with PR Notice 98-10 to add "Bag on Valve" packaging as an alternative package to the pump spray packaging. "Bag on Valve" packaging is made up of an aerosol valve with a bag welded to it. The bag is rolled, placed into a container and filled with the WFY0301 product (no change in formulation), while the Nitrogen propellant is between the bag and the wall of the container. In this way, a gas-tight separation of the product and the Nitrogen propellant is achieved. The product is dispensed at a similar rate to the normal pump spray. The advantage is that the container will still dispense the product when held upside down. The corresponding label change is made because the container is under 30 psi of pressure.

This notification is not subject to PRIA. Enclosed is the required form 8570-1 along with the product label with changes highlighted.

Please contact me should you have any questions regarding this submission.

Sincerely,

Louise A. Chartier
Registrations Manager

Avoid getting spray into horse's eyes, nose or mouth. Do not wet skin, or apply to the point of dripping or exceed two ounces per application. Reapply every 7 to 10 days under normal conditions for initial applications. As protection builds, reapply every 12 to 17 days as needed. Also, reapply each time animal is washed or exposed to heavy rain for best results. After application, brush thoroughly to bring out bright sheen on the coat.
