

MOMAR

BP 6000 LAWN WEED KILLER

CONTAINS TRIMEC HERBICIDE
KEEP FROM FREEZING
QUART COVERS 6,000 SQ. FT.

CONTAINS NEW PATENTED
TRIMEC HERBICIDAL CONCENTRATE
U.S. PATENT NO. 3,284,186

Contains: 2,4-D MCPP and Dicamba

ALSO KILLS: DANDELION, KNOTWEED, HENBIT, PLANTAINS,
SPURGE, POISON IVY and most other broadleaf weeds.

ACTIVE INGREDIENTS:

• Dimethylamine salt of 2-(2-methyl-4-chlorophenoxy) propionic acid	2.770%
• Dimethylamine salt of 2,4-dichlorophenoxyacetic acid	6.100%
• Dimethylamine salt of Dicamba (3,6-dichloro-o-anisic acid)	0.635%
• Dimethylamine salts of related compounds	0.080%
INERT INGREDIENTS:	90.415%
TOTAL	100.000%

- 2-(2-methyl-4-chlorophenoxy) propionic acid equivalent 0.195 pounds per gallon, equivalent to 2.22%
- 2,4-dichlorophenoxyacetic acid equivalent 0.432 pounds per gallon, equivalent to 5.01%
- 3,6-dichloro-o-anisic acid equivalent 0.045 pounds per gallon, equivalent to 0.52%

CAUTION: Keep out of reach of children.
See back panel for additional cautions.

DIRECTIONS FOR USE

WHERE TO USE: Momar BP 6000 Lawn Weed Killer may be used on Bluegrass, Bermuda, or Zoysia lawns, vacant lots, playgrounds and other similar areas where hard-to-kill weeds are present. This product is especially effective on all types of hard-to-kill weeds such as HENBIT, CHICKWEED, SPOTTED SPURGE, OXALIS, BLACK MEDIC, and SHEEP SORRELL. In addition to these, Momar BP 6000 Lawn Weed Killer controls most other broadleafed lawn weeds, including Dandelion and Plantain, and a partial list is given on the side panel.

Do not allow spray to get on vegetables or ornamental plants since injury may result. Since injury can be expected when used on Centipede or St. Augustine grass lawns, "spot-spray" weeds only. Clover present will be damaged if sprayed. Repeat if necessary for hard to kill weeds.

WHEN TO USE: Spray at any time during the growing season when weeds are actively growing. Treat Chickweed, Henbit, Wild Onion and Garlic in the fall or in the spring, as needed. On new lawns wait until the turf has reached a height of 2 inches before making an overall spray treatment. "Spot spray" weed treatment, however, may be made at any time with a small pressure sprayer, spraying only the weeds at ground level. Wait 3 weeks before putting new grass seed or stolons down in the bare spots. Poor weed control may result if spray is applied during drought or just before rain. For best results mow before treating. Do not water lawn within 24 hours after treatment.

NOTICE: Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment will vary, Seller makes no claims other than those stated on the label.

Do not reuse container. Destroy by burying in a safe place. Do not burn
