

MOMAR FLY-FYTER
INSECTICIDE AND DEODORANT

INSECTICIDAL ACTION FROM NEW SUGAR BASE BAIT WITH FAST ACTING DDVI

Active Ingredients

2,2-dichlorovinyl dimethyl phosphate.....0.265%
related compounds.....0.035%
Inert Ingredients.....99.500%

100.000%

KILLS RESISTANT FLIES

Sprinkle as a dry bait or mix with water to make liquid bait. Wet or dry - flies are attracted to it and it kills quickly! USE AROUND DAIRY BARNS, POULTRY HOUSES, HOG FARMS AND OTHER FARM APPLICATIONS

DIRECTIONS FOR USE

DRY BAIT - As a dry bait, simply shake right out of the can.

Scatter lightly on floors, window sills and other areas where flies congregate. Use about 4 ounces per 1,000 square feet. A faster kill may be achieved if applied to a moistened surface.

WET BAIT - As a liquid bait, dissolve one pound of dry bait in a half-gallon of water. The resulting liquid may then be sprayed on walls, painted on sills, or used to make bait stations. Bait stations need not be elaborate. Simply place 4 inch squares of paper toweling, burlap, cotton, or other absorbent material in a paper plate, pie plate or on a board. Then soak with fly bait. Bait stations should be placed at about 15 ft. intervals in each heavily infested building. After flies have been brought under control, treatment should be repeated at weekly intervals, or when needed.

Important! Do not over-use! Whether used as a liquid or a dry bait, this material is very effective, and a lightly scattered stream or a small bait station will be effective.

18 pt.
+ ype

→ CAUTION: KEEP OUT OF REACH OF CHILDREN. → 12 Pt. Type

CAUTION: HARMFUL IF SWALLOWED, OR ABSORBED THROUGH THE SKIN. DO NOT CONTAMINATE FEED OR FOODSTUFFS. DO NOT APPLY TO ANIMALS, OR BROUGHT INTO CONTACT WITH THE SKIN, WASH IMMEDIATELY WITH SOAP AND WATER. USE AS A COARSE WET SPRAY. AVOID BREATHING SPRAY MIST. KEEP FROM PETS. DO NOT SCATTER WHERE POULTRY FEED OR WHERE ANIMALS CAN LICK DRY BAIT OR SPRAYED SURFACE. NOT FOR USE IN HOMES OR WHERE MILK IS STORED OR PROCESSED. ATROPINE SULFATE IS ANTIDOTAL.
