Refined deodorized petroleum distillate, *Technical Methoxychlor,
beta-butoxy beta'-thiocyano diethyl ether, technical pyperonyl
butoxide. Consists of (butylcarbityl) (6-propylpiperonyl) ether
and other related compounds, N-octyl bicycloheptene dicarboximide,
pyrethrins. *Consists of 2, 2-bis (p-methoxyphenyl) -1, 1, 1 -
Trichloroethane and other Isomers and related compounds.

DIRECTIONS

FOR KILLING EXPOSED OR ACCESSIBLE STAGES OF ROACHES, FLIES,
MOSQUITOES AND CERTAIN OTHER FLYING INSECTS. Always spraying
towards the ceiling, fill the room with a mist of MOMAR FIRST-IN.
Be sure windows and doors are tightly closed before spraying and
keep them closed for at least ten minutes after spraying. Sweep
up stricken insects and dispose of them.

MOTHS, CARPET BEETLES, SILVER FISH AND BUFFALO BUGS: Spray thoroughly
all closets, trunks and other storage spaces, making sure to reach
all the hiding places of these insects. Brush and clean clothing
and spray it thoroughly, making sure to reach seams, folds and
other hiding places. Repeat every 3 or 4 weeks. This spray kills
all adults, larvae and eggs with which it comes in contact.

BED BUGS: Take beds apart and spray thoroughly all surfaces, cracks,
and crevices, also spraying springs, slats and mattresses, especially
all seams, tufts and bindings. Also spray around and behind wherever
possible all baseboards, picture molding and other similar places.
Watch infested rooms constantly and repeat as often as it is
necessary.

FLEAS INFESTING PREMISES: Remove and destroy animals' bedding and
spray sleeping quarters freely, forcing spray into all the cracks in
the floor and about the room. Repeat when re-infested.

18 pt. type ← CAUTION: KEEP OUT OF REACH OF CHILDREN. 12 pt. type

Harmful if swallowed. Remove or cover fish bowls, aquariums and caged
birds before spraying.
