

MOSQUITO-KIL

is a product especially prepared in concentrated form to be reduced with #2 fuel oil and used in fogging machines.

CAUTION

KEEP OUT OF REACH OF CHILDREN:

Harmful if swallowed or inhaled. Avoid breathing of vapor. Avoid prolonged or repeated contact with skin. Wash thoroughly with soap and water after handling. Change contaminated clothing daily. Avoid contamination of feed and foodstuffs. Keep all unprotected persons out of the operating area or vicinity where there may be danger of drift. Do not apply when weather conditions favor drift.

Do not re-use empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

FLAMMABLE MIXTURE

Net contents _____ Gallons

MOMAR MOSQUITO KIL

ACTIVE INGREDIENTS:

Petroleum Distillate	84.0%
Malathion (O, O-Dimethyl Dithiophosphate of Diethyl Mercaptosuccinate)	16.0%

DIRECTIONS:

Pour 5 gallons of **MOSQUITO-KIL** in a clean 55 gallon drum, and fill the drum with #2 fuel oil. Fog only when winds do not exceed 8 to 10 miles per hour. Determine wind direction and allow fog to drift on desired area, staying upwind from the fog. Avoid fogging to any parked cars or other property because an oily film may be deposited. Use approximately 8 ounces of actual Malathion per acre or 4 gals. of the diluted product per acre to kill adult mosquitoes and gnats.

FLIES:

Envelop in a fine fog or mist. Use fog for killing flies by fogging critical areas such as stables, barns, rubbish piles, etc. **DO NOT USE IN DAIRY BARNs OR ON LIVE-STOCK.**

MOSQUITOES AND GNATS:

Envelop total area to be treated with a coarse fog or fine mist allowing it to drift into tall grass in uncultivated fields, into shrubbery that would not be injured by the oily fog, also the fogging of roadsides, and wastelands where edible crops would not be contaminated or valuable ornamentals and shade trees would not be injured. Pay particular attention to all zones of stagnation.

MOSQUITO LARVAE IN STANDING WATER:

Apply at a rate of 1/2 pound actual Malathion (approximately 3 pints Mosquito-Kil) per acre.

This product is toxic to fish. Keep out of lakes, streams or ponds. Apply this product only as specified on this label.
