NET CONTENTS:

MOMAR ARREST I detergent-disinfectant has been designed especially for hospitals, nursing homes, schools, food processing plants, food service establishments and other institutions where housekeeping is of prime importance.

DISINFECTION - To disinfect hard inanimate surfaces such as walls, floors, table tops, add 2 ounces MOMAR ARREST I detergent-disinfectant per gallon of water. Apply solution with mop, cloth, sponge or miter and allow to remain on surface thoroughly. Allow to remain wet for 10 minutes, and then air dry.

To disinfect toilet bowls, flush toilet, and 2 ounces MOMAR ARREST I detergent-disinfectant directly to the bowl. Apply the other contents using a scrub brush or toilet mop, making sure to get under the rim, jets and the flush valve and flush.

For maximum effectiveness, a minimum of 10 minutes is required and recommended. Check a fresh solution for each use.

MILDOWSTAT - To control mold and mildew on previously hard inanimate surfaces such as floors, walls, table tops, add 2 ounces MOMAR ARREST I per gallon of water. Apply solution with a cloth mop or sponge, scrubbing surface until surface is completely clean and dry. Prepare a fresh solution for each use. Repeat application as required to prevent mold growth recurrence.

MOMAR ARREST I is a detergent-disinfectant which provides effective cleaning, sanitizing, disinfecting and deodorizing. MOMAR ARREST I detergent-disinfectant has been designed especially for hospitals, nursing homes, schools, food processing plants and other institutions where housekeeping is of prime importance in controlling the hazard of cross contamination.

MOMAR ARREST I when diluted at the rate of 2 ounces per gallon of water is an effective disinfectant against the organisms Pseudomonas aeruginosa and meets all requirements for hospital use when used at one of 500 parts per million. It is formulated to disinfect inanimate hard surfaces such as walls, floors, table tops, toilet bowls, toilet seats, and other fixtures. For larger areas such as operating rooms, patient care facilities, and other areas, the product is designed to provide both general cleaning and disinfecting.

In addition, MOMAR ARREST I also cleans those areas which generally are hard to keep fresh smelling, such as garbage storage areas, trash, garbage bins and cans, toilet bowls, and any other areas which are prone to heavy odors.

DISINFECTION - All 2 ounces per gallon dilution MOMAR ARREST I provides effective disinfection against the organisms, Bacillus anthracis, Bacillus cereus, and Streptococcus aureus.

As a virucide, the product is also fungicide against the pathogenic fungi. The fungicide is highly effective against the product when used on environmental inanimate hard surfaces at 2 ounces per gallon of water. The product is also virucide against the pathogenic A. As an antiparasitic, it is effective against the larvae of the housefly, the cockroach, and the mosquito. As an antiparasitic, it is effective against the larvae of the housefly, the cockroach, and the mosquito. As an antiparasitic, it is effective against the larvae of the housefly, the cockroach, and the mosquito.

For maximum effectiveness, a minimum of 10 minutes is required and recommended. Check a fresh solution for each use.
