ACTIVE INGREDIENTS
 Pyrenone
 Methyl Parathion
 Methyl Isocyanide

Pyrenone is a powerful insecticide and acaricide. It is effective against house flies, stable flies, horn flies, and ticks. It is also effective against lice and mites.

Directions for Use:
 Pyrenone is used as a fly repellent and insecticide in dairy and industrial environments. It is applied as a spray to surfaces where flies are likely to breed or feed.

Pyrenone is highly effective against house flies, stable flies, horn flies, and ticks. It is also effective against lice and mites.

Directions for Use:
 Pyrenone is used as a fly repellent and insecticide in dairy and industrial environments. It is applied as a spray to surfaces where flies are likely to breed or feed.

DISPOSAL

Pyrenone is highly toxic to fish and aquatic life. It should be disposed of properly to avoid environmental contamination.

CAUTION:
 Pyrenone is highly toxic to fish and aquatic life. It should be disposed of properly to avoid environmental contamination.

KEEP OUT OF REACH OF CHILDREN
CAUTION
 See side panel for additional precautions

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING: Hold container upright, shake away from you and press action of button, spraying as directed.

To Treat Animals:
 To protect cattle from attacks of stable flies, house flies, horn flies, and ticks, spray animals with Pyrenone. Spray the face and head but do not spray the eyes. Repeat treatment as necessary.

Pyrenone is highly toxic to fish and aquatic life. It should be disposed of properly to avoid environmental contamination.

CAUTION:
 Pyrenone is highly toxic to fish and aquatic life. It should be disposed of properly to avoid environmental contamination.
