MOTH CAKE REFILL

Wash or dry clean garments to be stored. Use one STANLEY One Pounder Moth Cake in each average size closet. (For best results, allow one One Pounder for each 50 cu. ft. of tightly enclosed space.) Hang One Pounder in the upper part of closet or other storage space.

TO INSTALL MOTH CAKE IN CONTAINER:

1. To remove back of Container: Lift up wire hanger, turn down over face of the Container and take out. Then remove flat metal clip which holds perforated back in place.
2. Remove wrapping from One Pounder Moth Cake and fit it into Container. Replace perforated back.
3. Hook grooved end of metal clip into notch at bottom of Container. Insert other end of metal clip (with hole in it) through slot at top of perforated back. Press into place so that hole in metal clip lines up with the hole in the top of Container.
4. Hold Container upright in left hand. Press the metal clip with left thumb so that the hole in the clip is exactly under the hole in the Container. Then insert short end of wire hanger through both holes and turn up to normal position.

Check your One Pounder Moth Cake every four months, oftener in warm weather. Additional One Pounder Moth Cakes can easily be obtained from your Stanley Dealer.

CAUTION: (10 pt. upper & lower case) Avoid prolonged inhalation of fumes in heavy concentration. Avoid contact with skin and eyes.

STANLEY HOPE PRODUCTS, INC., WESTFIELD, MASS.

MADE IN U.S.A.

"One Pounder Moth cake Refill" continued

Side:

"There 's an honor in business that is the fine gold of it; that reckons with every man justly; that loves light; that regards kindness and fairness more highly than goods or prices or profits."

Longfellow

Other Side:

Quality plus (R)

Paradichlorobenzene is recommended by the U.S.D.A. for home use in protecting against moths. The odor from "Stanley" One Pounder Moth Cake (100% paradichlorobenzene) quickly disappears when garments are removed from storage.
