Read Cautions On Back Panel.

NET WT. 10 OZ.

(1/8" H. + FPLA requirements)

Locate where desired: (Stanhome tm) (R)

BACK:

Stops insects "in their tracks"! No need to spray insects directly. Puts down an invisible film that's effective for several weeks -- kills ants, roaches, waterbugs, silverfish, crickets, spiders and centipedes which come in contact with it.

To control annoying insects:

- 1) Hold container upright 6" - 12" away from surface, with spray outlet pointing away from you.
- 2) Spray to cover 1 to 2 feet per second. Moisten surface well but avoid overspraying.

For Ants -- Spray ant trails and openings where ants enter the house -- around doors, window frames, cracks or openings in floor, foundation or structure.

For Roaches, waterbugs, silverfish, spiders and centipedes -- Spray cracks, crevices, baseboards, under and in back of sinks, refrigerators, shelves, drawers, book cases and other areas where insects hide or nest.

For Wasps -- Spray into nest thoroughly in late evening or when it is cool and wasps are at rest.

(10 Pt. Caps)

CAUTION: Harmful or fatal if swallowed. If swallowed, do not induce vomiting. Contains petroleum distillate. Call physician immediately. Avoid prolonged breathing of vapors. Do not use as space spray. If spray gets into eyes, flush eyes with plentiful amounts of water. May be absorbed through skin -- avoid contact with skin.

(3 Ft. U & L)
