Contents Under Pressure. See caution on back panel.

NET WT. 9 1/2 OZ.(269 g)

DIRECTIONS FOR USE

Shake well before each use. Remove protective cap. Aim spray opening away from person. Push button to spray.

Roaches, Earwigs, Grain Mites, Sowbugs, Spiders and Centipedes. Spray baseboards, cracks and crevices around door and window frames and other hiding places, such as closets, in back of and under appliances, sinks and cupboards in the kitchen and bathroom, in basements, spray hiding places in cracks and crevices, lower walls and dark places. Spray at the rate of 3 to 4 seconds per linear foot at a distance of 12 to 14 inches from the surface. Spray directly on insects where possible. Repeat as necessary

ANTS Apply to ant trails and around door sills, window frames and other places where ants may enter

TO REDUCE ANNOYANCE FROM FLYING INSECTS:
INDOORS: Houseflies, mosquitoes, gnats. Close all doors and windows. Point nozzle upward, direct the spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

OUTDOORS: Reduce mosquitoes, gnats (midges), houseflies, deer flies and horseflies, and small flying moths (millers) by spraying their resting areas. Follow precautions listed below. Hold container 18 to 24 inches from shrubs, bushes, and grassy areas. Spray these areas with a slow sweeping motion at the rate of from 1 to 3 seconds per cubic feet of space while moving away from the treated areas. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary. Treat open porches and patios in a similar manner

WASPS: Applications should be made in the late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat, as necessary.
