Net Volume

Gallon

1598-120

APPLE, PEACH, PEAR, CHERRY, AND PLUM -- To control San Jose scale, peach leaf curl, overwintering spores of apple scab on apples and pears, and overwintering spores of brown rot on peaches, cherries, and plums, use 12 1/2 gallons of Lime Sulphur Solution per 100 gallons of water in the spray mixture (1 part of Lime Sulphur Solution to 8 parts of water, by volume). Apply the spray by means of conventional high-volume, high-pressure hydraulic sprayer during the dormant season only, using a sufficient quantity of spray to wet thoroughly twigs, branches, limbs and trunks of each tree, and debris under the trees. Do not apply during freezing weather.

CAUTION

Harmful if swallowed. May produce irritation of skin or eyes. In case of contact wash immediately with soap and water; for eyes flush with water and get medical attention. Avoid contamination of feeds and foodstuffs.

DO NOT USE, STORE, POUR, OR SPILL NEAR HEAT OR OPEN FLAME.

Do not contaminate any body of water with this product.

DESTROY EMPTY CONTAINERS. Do not reuse this container for any purpose. If container is glass, break into a previously prepared pit on non-crop land in an isolated area well away from water supplies, and bury fragments deeply. If container is metal, punch holes in top and bottom, crush under wheels of a heavy vehicle or with an axe, and bury crushed container in a pit on non-crop land well away from water supplies.

NOTICE

Follow directions carefully. Timing and method of application, weather and crop conditions, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage, or handling of this material not in strict accordance with directions given on this label.
