

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION**

Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish, birds and other wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

**PHYSICAL OR CHEMICAL HAZARDS**

Do not use, pour, spill or store near heat or open flame.

**STORAGE AND DISPOSAL**

Do not reuse empty container, wrap container and put in trash-collector

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is an emulsifiable concentrate which must be diluted or mixed with water for application as an insecticidal treatment of termites which live in the soil, under the conditions or in the situations described below. To mix, stir the specified amount of concentrate into the volume of water required for uniformly thorough spray coverage; agitate during application

**SUBTERRANIAN TERMITES (Non-Professional Use)** Remove all wood and other cellulose material in contact with the soil, in or around or under the structure to be treated. Prepare 1 percent of Chlordane by mixing 1/2 gallon of this concentrate in 25 gallons of water (1 pint in 6 1/2 gallons of water), and apply as follows

**ACCEPTED**  
**1598-244**  
AUG 18 1980  
Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended by the pesticide registration act of 1972  
EPA Reg. No. 1598-244

**CHLORDANE 4**

Insecticide Emulsifiable Concentrate

**INGREDIENTS**

ACTIVE INGREDIENTS, PERCENT BY WEIGHT	
Technical chlordane	43.92 %
Xylene range aromatic solvent	52.08 %
INERT INGREDIENTS	4.00 %
Total	100.00 %

\* Equivalent to 26.35 per cent octachloro 4, 7-methanotetrahydroindane and 17.57 per cent related compounds.

THIS PRODUCT CONTAINS 4 POUNDS OF CHLORDANE PER GALLON

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

- If Swallowed-Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention immediately.
- If Inhaled-Remove victim to fresh air and apply respiration if indicated.
- If On Skin-Wash promptly with soap and water. Rinse thoroughly.
- If In Eyes-Rinse eyes for at least 15 minutes with water and call a physician immediately.

**BUILDING WITH BASEMENTS OR CRAWL-SPACES**

First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the footing. Make holes closer in hard packed clay soils. Never dig below the top of the footing. Apply the solution in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the back-fill. Likewise, treat along the inside of foundations of crawl-space buildings. Cover treated soil with a thin layer of untreated soil, and take care to avoid contaminating water supplies.

For raised porches, terraces, and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of solution into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by professional pest control operators.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Professional Pest Control Service.

"Avoid contamination of public and private water supplies by following these precautions. Use anti back flow siphonage equipment. Refer to federal (Federal Housing Administration), state, and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells should not be treated if it is water saturated, or by injecting the solution under pressure. Soil should be removed to an area safe from well contamination, treated, and returned to the trench which has been lined with plastic sheeting."
