

NO-MILDEW vapor penetrates into the most inaccessible areas! It sprays on a temporary white coating which evaporates in air, leaving an invisible film. This inhibits mildew growth at least 30 days on fabrics and 14 days on leather.

### DIRECTIONS

Be sure that spray opening is pointed away from you. Holding can 12 inches from surface, spray article thoroughly, on both sides if possible. Repeat treatment as required.

Extraordinary protection is assured for articles stored in confined areas or in tightly closed containers or wrappings. After unwrapping, thoroughly air to dissipate vapors.

Leather has many different finishes, so test on an inconspicuous portion to make sure there is no staining reaction.

### IMPORTANT

Treated white fabric should be washed or dry cleaned before exposure to sunlight.

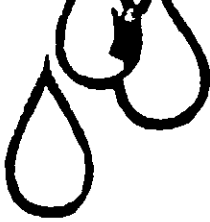

### CAUTION

Avoid inhalation and eye contact. If sprayed on skin, wash thoroughly. Do not spray humans, pets, food utensils or near food. Articles worn next to the skin should be dry cleaned or washed before wearing.

DO NOT PUNCTURE OR INCINERATE CONTAINER. DO NOT STORE AT TEMPERATURE ABOVE 110 F.

Do not spray on varnished surfaces.
