

protects
all woollens

REEFER-GALLER

odorless
stainless

DIRECTIONS

Remove protective cap. Direct nozzle opening away from you and toward fabric surface. Press down valve to release spray.

USDA Reg. No. 1603-14

REEFER-GALLER MOTH PROOFER sprayed on woollens kills moths, carpet beetles, their eggs and larvae, and provides a protective deposit that kills on prolonged contact. One treatment protects woollens from these destructive insects for a FULL YEAR. Respray if washed or dry cleaned.

Do not puncture or incinerate container. Do not store at temperature over 120°F. or in direct sunlight. Do not spray on plastics, asphalt tile or anything affected by petroleum distillates. Harmful if swallowed. Contains PERTHANE.

Do not spray on humans or animals. Remove pets and fish bowls from spraying area. In case of skin contact, wash with soap and water. Use in ventilated room and avoid inhalation. Do not smoke while spraying. Avoid spraying near food or cooking utensils. Wait until clothing is dry before wearing.

Diethyl diphenyl dichloroethane 4.75%
Other related compounds .25%
Petroleum distillates 56.33%
38.67%

CONTAINS NO ODT

© REEFER-GALLER, INC. • NEW YORK, N. Y.

14 oz. net wt.

Woolen articles should be clean before treatment. Hold container about 18 inches from fabric and move spray across at about 1 foot per second. To avoid waste, space applications about 6 inches apart. Avoid saturating; properly sprayed articles should be just moist to the touch. For best results, spray article on both sides where possible. Pay special attention to seams, cuffs, folds and tufts. Some dyes are not colorfast, under any conditions, so test REEFER-GALLER MOTH PROOFER on an inconspicuous portion of the article being treated. Do the same with pile fabrics since partial moistening may affect the nap. An average suit takes about 2 minutes spraying time, a medium weight blanket about 4 minutes. For additional protection, spray insides of closets and storage containers. Direct spray toward cracks and baseboards where insects may hide and breed. REEFER-GALLER MOTH PROOFER will not injure furs; however, furs should be moth-proofed by experts.

This product is not intended for large scale treatment of rugs or carpets, but will furnish excellent spot protection. Use in concealed and undisturbed areas such as under furniture, in corners and around baseboards. When storing rugs use SLAK CEDARIZED SPRAY AND SNOW-WHITE NUGGETS OR CRYSTALS.

For effective moth protection use NO MOTH in EVERY storage closet.
