

especially for use
in garment bags

DIRECTIONS

1. Be sure to remove inside wrapper from cake and replace cake in **MOTHINE HANGERETTE**. 2. Thoroughly brush or clean all garments before they are stored. 3. Attach **MOTHINE HANGERETTE** to clothes hanger or to wire, at top of each garment bag because the vapor works downward. 4. One **MOTHINE HANGERETTE** is sufficient for up to 18 cubic feet of tightly confined space. Keep garment bag tightly sealed at all times. 5. For continuous protection place a new **MOTHINE HANGERETTE** in garment bag before this one is entirely evaporated. 6. Do not put **MOTHINE** with naphthalene or camphor or use with styrene plastic hangers.
