HOW TO USE

Open plastic container by
pressing on side where indicated
center snap open cover held
on the hang-up hook.
Remove the cake from ordinary
drabard-like protective
wrappings and replace
cake. Close lid. Snap shut.
Hang on rod or hook higher
closer to insure the most effec-
tive vapor distribution.
Convenient hook locks on
rod by pushing tab into hole.
Refill when needed for same
continued protection.

DIRECTIONS

Before storing, clothes should be cleaned
and thoroughly brushed and aired in the sun.
Keep closet door tightly closed for about a
week because of this chemical. At all times,
open only when necessary so that vapors
may remain concentrated. If opened, add
additional chemical and close for period
specified.

One four oz. container protects up to 85 cubic
feet of unobstructed closet space. For larger
closets, use two or more containers. For
complete assurance, keep closet doors

CAUTION Do not use with incompatible
products such as talcum powder, and soap.

They may compete. After it is used, the
closet should be aired out completely before
returning to use.
