

DIRECTIONS:

For Swimming Pool Algaecide

1. If algae growth is observed, add one gallon Warlasco Swimming Pool Algaecide for each 10,000 gallons of water to kill and control those algae species most commonly found in swimming pools.
 2. When existing growth is dead and algae have withered, clean the pool, draining and refilling if necessary, then add one gallon of Warlasco Algaecide for 25,000 gallons of water.
 3. If algae growth is absent, use one gallon Warlasco Algaecide for each 25,000 gallons of water to prevent algae growth.
 4. Add one gallon of Warlasco Algaecide per 50,000 gallons of water every 5-7 days to maintain between two and five parts per million of active ingredient. See serviceman for test kit.
- Rinse empty container thoroughly with water and discard it.

SWIMMING POOL ALGAECIDE AND LOCKER ROOM DISINFECTANT 10%

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of Warlasco Algaecide will help to maintain the water in a clean, sanitary condition.

Warlasco Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with Warlasco Algaecide, the chlorine demand of the pool may be significantly reduced.

CAUTION! KEEP OUT OF REACH OF CHILDREN
See Right Side Panel for Additional Cautions.

ACTIVE INGREDIENTS:

Methyldodecylbenzyl trimethyl ammonium chloride 8% and methyldodecylxylylene bis (trimethyl ammonium chloride) 2% .. 10%

INERT INGREDIENT:

Water 90%
..... 100%

PHENOL COEFFICIENTS:

Salmonella typhosa — 25
Staphylococcus aureus — 40

USDA Reg. No. 1616-87

Manufactured for

WARREN-DOUGLAS CHEMICAL CO., Inc.

Sioux City, Iowa OMAHA 2, NEBRASKA Des Moines, Iowa

NET CONTENTS 1 GALLONS

DIRECTIONS:

For Locker Room Disinfection

Guard against spread of athlete's foot ^{fungi} by mopping walkways, poolside and locker room floors with solution of Warlasco Algaecide and Disinfectant. Use it also to disinfect bathing suits and caps.

1. Clean floors and runways with suitable detergent, then mop with solution containing one ounce Warlasco Algaecide and Disinfectant per gallon of water.
2. After washing, immerse suits and caps for ten minutes in solution containing one ounce Warlasco Algaecide and Disinfectant per gallon of water. Wring and hang to dry.

CAUTION

Undiluted Warlasco Swimming Pool Algaecide 10% Disinfectant may cause skin irritation or damage to the eyes. Harmful if swallowed. Avoid contact with skin and eyes. Do not take internally. For eyes, flush immediately with plenty of water and get immediate medical attention. Avoid contamination of food.

Do not mix with soaps or anionic detergents.
