

# BIRD TANGLEFOOT

Maintain clean, sanitary conditions  
by repelling bird pests.

EFFECTIVE      ECONOMICAL      LONG  
LASTING      HUMANE      WEATHERPROOF  
NON-INFLAMMABLE      EASILY APPLIED

**General Information:** BIRD TANGLEFOOT is a non-drying compound which adheres to most surfaces, and retains its soft, sticky elasticity. BIRD TANGLEFOOT will repel birds for periods exceeding a year under average conditions. Birds will not roost where it has been applied.

**Direction:** Puncture seal in spout and insert this cartridge in a standard caulking gun. Apply to clean, dry surfaces. Treat roosting places such as window sills, ridge lines of roofs, gutters, ledges, tops of signs, ornamental copings, eaves, and ledges. On ledges, apply a line 1/2 inch thick about 1/2 inch from the outer edge with another line about 3 inches back. For extra wide ledges, apply several such lines or apply a line front and back with 5-10 inch spaces between. On exceptionally porous or absorbent surfaces, although not essential, an undercoating such as paint may be desirable. Where prompt removal is anticipated, applications may be made over water-proof masking tape or other cover material. Solvents may be helpful to remove BIRD TANGLEFOOT from hands or tools. In weather above 40 degrees F., store in a warm place until immediately prior to use.

Acrylic based emulsions	100%
Polystyrene	97%
Hydroxyethyl Cellulose	3%

WEIGHTS: 1 TO 1.5 GALLON  
1 TO 1.5 IMPERIAL GALLON

DO NOT REMOVE PLASTIC CAP  
ON BOTTOM WHEN INSERTED  
IN GUN. PLUNGER BREAKS  
AWAY UNDER PRESSURE. WHEN  
PRESSURE OF GUN RATCHET IS  
RELEASED, PLUNGER RETURNS  
TO ORIGINAL SHAPE AND STOPS  
FLOW.

USDA Reg. No. 1621-17

BIRD TANGLEFOOT

CAUTION: KEEP OUT OF REACH OF CHILDREN

*Stops bird roosting*

# BIRD TANGLEFOOT

*An effective bird repellent*

**General Information:** BIRD TANGLEFOOT is a non-drying compound which adheres to all surfaces, and retains its soft, sticky elasticity. BIRD TANGLEFOOT will repel birds for periods exceeding a year under average conditions. Birds will not roost where it has been applied.

**Directions:** Puncture seal in spout, and insert this cartridge in a standard caulking gun. Apply to clean, dry surfaces. Treat roosting places such as window sills, ridge lines of roofs, gutter edges, tops of signs, ornamental copings, cornices, and ledges. On ledges, apply a line 1/4 inch thick about 1/2 inch from the outer edge with another line about 3 inches back. On extra wide ledges, apply several such lines, or, apply a line front and back with "S" or "Z" lines between. On exceptionally porous or absorbent surfaces, although not essential, an undercoating such as paint may be preferred. Where prompt removal is anticipated, applications may be made over waterproof masking tape or other cover material. Solvents may be helpful to remove BIRD TANGLEFOOT from hands or tools. In weather below 40 degrees F., store in a warm place until immediately prior to use.
